

EDUCATION

Bachelor of Technology (ECE) 73%

Sree Venkateswara College Of Engineering
2018 – 2022

M.P.C (93.4%)

Viswasai Junior College
2016 – 2018

SKILLS

- Backend Development: PHP, Laravel
- Frontend Development: HTML, CSS, JavaScript, Bootstrap
- Programming Languages: PHP Core Java
- Tools: npm, npx
- Database: MySQL
- Microsoft Office Suite: Word, Excel, Outlook

Soft Skills

- Excellent verbal and written communication
- Strong analytical and problem-solving abilities
- Detail-oriented with high accuracy
- Effective team collaboration
- Ability to work independently
- Adaptability in fast-paced environments
- Eagerness to learn new technologies
- Strong organizational and time management skills

INTERESTS

- Technology Adaptability
- Language learning and communication
- Travelling

CERTIFICATIONS

- Java Full Stack Web Development from Tap Academy.
- Membership in INSTITUTION OF ELECTRONICS AND TELECOMMUNICATION ENGINEERS [IETE]

SUMMARY

ECE graduate with 1.5 years of backend development experience using PHP and Laravel. Skilled in HTML, CSS, JavaScript, and Bootstrap. Strong core Java knowledge. Experienced in creating efficient and scalable web applications. Excellent at teamwork and individual tasks. Quick to adapt to new technologies.

E-commerce Coffee Shop:

- Developed an e-commerce platform with a focus on enhancing user experience through frontend functionalities.
- Set up advanced filtering options to help users find products efficiently.
- Implemented a robust cart and checkout system to ensure a smooth purchase process.
- Created category-based product views to organize and display products effectively.

Hotel Booking System

- Developed a dynamic online platform powered by PHP framework Laravel, facilitating smooth product listing and seamless user interactions through an advanced backend system.
- Implemented an online booking system that allows users to make reservations effortlessly.
- Integrated a daily status feature for rooms with a date filter, enabling users to check availability and status updates in real-time.

Mini Projects:

- Contributed to over 10 projects, enhancing backend and frontend integration to improve user experience.
- Implemented functionality for dynamically adding image content from the backend to the frontend.
- Enabled seamless content management, allowing for efficient updates and additions of images

Academic Projects

Image Processing in Cloud Computing

- Developed an image processing project leveraging cloud computing technologies during the final year of college.
- Utilized cloud resources to efficiently handle and process large sets of images.
- Implemented algorithms for image enhancement, transformation, and analysis, demonstrating the practical application of cloud computing in image processing tasks.
