

AWS-DevOps Engineer

Chandana TN

Email: chandanatn11@gmail.com

Mobile: +916362862349

Address: Bangalore, Karnataka

OBJECTIVE

Seeking an entry-level DevOps role to apply my software development and automation skills, contributing to efficient software delivery and supporting the organization's growth.

SKILL-SUMMARY (AWS&DEVOPS)

- Hands-on knowledge with user-level **Linux** commands.
- Hands-on experience with DevOps tools such as **Git, Maven, Jenkins, Ansible, Docker, and Kubernetes**.
 - Good Hands-on knowledge in Source version management tools, particularly **GIT**.
 - Practical hands-on experience with **GitLab**.
 - Hands-on experience on build tools and packaging source code with **Maven**.
 - Installation and configuration experience with **Jenkins**.
 - Hands-on experience in implementing **CI/CD** pipelines using tools such as **Git, Maven, and Jenkins**.
 - Skilled in the installation and configuration of **Ansible**.
 - Performed automation tasks using **Ansible**.
 - Hands-on experience installing **Docker** and writing **Dockerfiles** for building **Docker images**.
 - Understanding of **Kubernetes** for basic management and deployment of containerized applications.
 - Hands-on knowledge in **Amazon Ec2** deployments using DevOps tools such as **Jenkins, Docker, and Kubernetes**.
- Good Hands-on knowledge on Amazon Web Services (AWS) such as **VPC, EC2, IAM, Load balancer, Cloud watch, Route53, Auto scaling** and **Terraform**.
 - Proficiency in launching **Amazon EC2 instances** on AWS using **Linux/Ubuntu** and configuring them for specific applications.
 - Hands-on experience in **Load Balancers** for effective traffic distribution, with a focus on configuring **Application Load Balancers (ALB)** and managing **target groups**.
 - Skilled in **AWS Autoscaling** and Launching Templates for effective management of EC2 instances.
 - Hands-on knowledge in creating AWS Network Architecture, including **VPCs, Subnets, Internet Gateways, NAT Gateways, and Route Tables**.
 - Hands-on experience in using **CloudWatch** to set up alarms for better system monitoring.
 - Hosting static web applications on **Amazon S3**, including expertise in mapping S3 static website URLs to domain names through DNS mapping using **Route 53**.

TECHNICAL SKILLS

Repository tool	GIT & GitLab
Code deployment tool	Jenkins
Build tool	Apache Maven
Containerization tool	Docker
Orchestration tool	Kubernetes
Configuration management Tool	Ansible
Web servers	Apache2, Tomcat
Monitoring Tool	AWS CloudWatch
Infrastructure Provisioning Tool	Terraform
AWS CLOUD PLATFORM	EC2, IAM, VPC, Route53, S3, ELB
Operating Systems	Linux, Ubuntu

PROJECT

Project-1: Web application Deployment using CI/CD pipeline

Key Points:

- Developed **HTML files** utilizing HTML scripting language for the creation of web applications.
- Configured **AWS Security Groups** to control inbound and outbound traffic efficiently.
- Launched **Amazon EC2 instances** on Amazon Web Services (AWS) using **Linux/Ubuntu** operating system and Configuring launched instances with respect to specific application requirements.
- Implemented version control with **GitLab** to efficiently manage and track changes in the source code.
- Automated deployment processes using **Jenkins** and established a **CI/CD pipeline**.
- Integrated **Jenkins** with **GitLab** and configured **GitLab webhooks** for automatic pipeline triggers on code changes.
- Utilized the **Blue Ocean Plugin** to provide clear visualization of pipelines.

EDUCATION

SJC Institute of Technology, Chikkaballapur

BE, Mechanical Engineering

Vivekananda Pre-University College, Puttur

Karnataka Pre-University Board

Rural High School, Maragowdanahally

Secondary School Leaving Certificate-10TH GRADE

CGPA: 7.83

Aug 2017 – Aug 2021

Percentage: 69.33

June 2016 - May 2017

Percentage: 79.52

May 2015

LANGUAGES

- English
- Kannada
