PROFESSIONAL SUMMARY

A **.NET Full Stack Engineer** with expertise in crafting dynamic **web applications** using **C#, ASP.NET, and front-end frameworks like React, MVC**. Specialized in **Database management** using **SQL Server** and **Kofax development** for automation and document processing. Passionate about building scalable, high-performance solutions, and excelling in collaborative, fast-paced environments.

KEY SKILLS

ASP.NET, MVC Framework, SQL server, Web API, C#, JAVA, Entity Framework, .NET, DBMS, HTML,SQL Server, MySQL ,NUnit Testing, JIRA, GIT

WORK EXPERIENCE

Programmer Analyst Sept 2023 - Present
COGNIZANT , Bangalore

- Projects:**
Kofax Developer
- Configured and customized Kofax Total Agility platform to automate document processing workflows, resulting in a **30% increase** in efficiency.
 - Designed and implemented document classes, types, and capture profiles **tailored to client requirements**.
 - Developed SQL scripts** for database management, optimizing data retrieval and ensuring data integrity.
 - Integrated Kofax Total Agility with CRM and ERP systems using APIs and web services, streamlining data exchange processes.
 - implementing software post-development for seamless integration, conducting regression testing to ensure software integrity and analyzing workflows to optimize **100% efficiency** overseeing.

PROGRAMMER ANALYST INTERN JAN 2023 - SEPT 2023
COGNIZANT , Bangalore

- Project:**
Inventory and Asset Management System
- Led the development of an enterprise-level Inventory and Asset Management System using **ASP.NET, MVC, and Entity Framework** to streamline asset tracking and for seamless **database interaction** and ORM.
 - Improved operational **efficiency by 80%** through automation of asset lifecycle management, inventory audits, and real-time tracking via **RESTful Web APIs**.
 - Developed a user-friendly, responsive interface with advanced search filters, asset categorization, and location-based tracking, **increasing user productivity by 40%**.
 - Utilized **SQL Server** with **Entity Framework**, optimizing data retrieval and management through stored procedures and indexing, **reducing query response times by 30%**.
 - Implemented key modules such as asset registration, inventory control, depreciation tracking, and automated reporting, ensuring data accuracy and compliance with company policies.

ACCOMPLISHMENTS

- AWS certified:** Cloud Practitioner
- Udemy Certified:** JavaScript
- Captiva 201-cognizant
- GFG Certified:** Data Structures

EDUCATION

- Bachelor of Engineering (2019 - 2023) - **Compute and Science Engineering (CSE)** - CGPA: 8.2
Lovely Professional University (LPU), Jalandhar, Punjab
