[My LinkedIn profile](#)

DATA ENGINEER

- To utilize my 2+ years of IT industry experience, specializing in designing and implementing scalable ETL pipelines, managing data frameworks, and optimizing cloud-based solutions like GCP Services. Committed to delivering high-performance data infrastructure, enhancing data integration processes, and enabling organizations to make data-driven decisions through innovative, technically sound, and efficient solutions.

TECHNICAL SKILLS

- Proficient in MySQL
- Data Modeling
- AWS Services
- Python
- Pyspark basic
- Jmeter and Postman
- GCP Services
- Snowflake
- ALM and Azure DevOps
- Tableau and PowerBI
- Apache Beam
- Linux (Ubuntu) and Windows

WORK EXPERIENCE

Overall 2+ Years Experience

DATA ENGINEER

Quantiphi Analytics and Solutions | Bengaluru

Feb 2023 - Present

- **Domain** : Spearheaded Data Migration projects in **Insurance and Commonwealth Fair sectors**, ensuring seamless transition and minimal disruption.
- **ETL** : Developed custom **ETL** pipelines and rigorous automation testing protocols, optimizing data integrity and accuracy
- **ETL Tools** : Specialized in **GCP Cloud Composer**, harnessing its capabilities to design and manage complex ETL workflows with efficiency and scalability.
- **Data Load Mechanism**: Implemented **Change Data Capture** (CDC) mechanisms, enhancing data management by capturing and processing only the changed data for increased efficiency.
- **Methodologies**: Proficiently applied **SCD Type 1** and **SCD Type 2** methodologies, ensuring effective handling of slowly changing dimensions for comprehensive data management.
- **Commits**: Committed to continuous learning and staying abreast of technological advancements, fostering personal and organizational growth in the rapidly evolving data landscape.
- **Matter of worked area** : Specialized in database testing for Data Migration projects, ensuring adherence to client requirements.
- Achieved 95% efficiency in ETL workflows by designing and managing scalable pipelines using GCP Cloud Composer.
- Ensured 99.9% data accuracy during data migration projects in Insurance and Commonwealth Fair sectors, minimizing disruption and ensuring seamless transitions.
- **Deployment and Testing**: Specialized in database testing for data migration projects, ensuring adherence to client requirements. Independently managed and deployed change requests during sprint closure, ensuring project continuity and client satisfaction.

INTERN TEST AUTOMATON ENGINEERING

Quantiphi Analytics and Solutions |  Bengaluru

Oct 2022 - Feb 2023

- During my internship, I gained 100% proficiency in foundational concepts and domain knowledge, leading to a seamless transition into a Data Engineer role.

PROJECT EXPERIENCE

Project 1 : MX Life Science Services, LLC Project

- **Gathering and Analyzing Client Requirements** : Actively engaging with clients to understand their needs and translating these into technical requirements to ensure alignment with project goals.
- **Role and responsibility** : Playing a pivotal role in the implementation and optimization of Cloud SQL, ensuring efficient data storage, retrieval, and processing to meet the specific needs of healthcare applications.
- **Leveraging Cloud Technologies** : Utilizing cloud infrastructure and tools to design and deploy scalable, secure, and efficient data solutions, enhancing client outcomes and operational efficiency.
- **Delivering Solutions Ahead of Deadlines** : Consistently meeting and exceeding client expectations by delivering high-quality solutions within tight deadlines.

Project 2 : Canadian insurance and wealth management group Project

- **Understanding Client Requirements** : Engaging closely with clients to comprehend their needs and translating them into actionable technical solutions.
- **Exceeding Client Expectations** : Delivering high-quality data solutions consistently ahead of deadlines, ensuring client satisfaction.
- **Role and responsibility** : Designed and managed ETL pipelines to automate SQL scripts, enabling efficient batch data processing and workflow optimization. Ensured seamless data integration and transformation processes while maintaining data accuracy and scalability.
- **Automating SQL Queries** : Developing automation for SQL queries to enhance efficiency and reduce manual intervention.
- **Validating Historical and Incremental Data Loads** : Ensuring data accuracy and integrity by validating both historical and incremental data loads.
- **Transforming Live Data to Tables** : Loading data from live service APIs and transforming it into tables for further analysis and reporting.

Project 3 : American Insurance Project

- **ETL** : Loading data from different source system into target tables for further analysis and reporting.
- **Role and responsibility** : Playing a small role in implementing and optimizing Cloud SQL to meet client needs effectively.

EDUCATIONAL HISTORY

BACHELOR IN MECH.ENGINEERING

Anna University, GPA : 7.9/10
2018 - 2022

[GCP SERVICES Hand-on Profile](#)

AWARDS

CERTIFIED IN GCP, AWS, AND SNOWFLAKE

-  Associate Cloud Engineer
-  Certified Solution Architect AWS
-  Snowflake Snow Core Snowflakes
-  Certified in SQL Intermediate HackerRank
