Programming language: ReactJS, NodeJS, ExpressJS

Project: Sr.Pago

Tools/Technologies: ReactJS, Redux, Material UI, ExpressJS

Tenure: Specs scale

Project Description: Sr.Pago is a mobile point of sale (MPOS) system that enables individuals and small businesses to receive card payments via smartphones and tablets. It enables users to have access to banking-related services via a chip-based debit card, a card reader that connects to any smartphone or tablet, and an app for managing transactions.

The MPOS system enables its users to accept credit card payment for the services they render, transfer that money to a reloadable MasterCard debit card, and make purchases with those funds anywhere MasterCard is accepted, and a withdraw cash from any Walmart-affiliated location in Mexico.

Programming language: ReactJS, NodeJS, ExpressJS

Project: Halaplay

Tools/Technologies: ReactJS, Redux, Bootstrap, ExpressJS

Tenure: Specscale

Project Description: HalaPlayApk App: Halaplay Is A Daily Fantasy Sport (Dfs) Platform That Empowers Serious And Casual Sports Enthusiasts To Play Cash-Based Quick, Simple And Interesting Games

Modules: Cricket, Football

Programming language: ReactJS, NodeJS, ExpressJS

Project: Market Analyst,
Tools/Technologies:ReactJS, Redux, NodeJS, ExpressJS
Tenure: AppSpace

Project Description: Provides a single window personalized access to market data, insights, news, pre-built screeners, charts, internal and third party research, licensed content, alerts, automated content and watchlists with the ability to combine with client portfolio Information

Key feature includes:

- Smart Intelligence for Search
- Ready to view Intelligence
- Integrated with Client content
- Portfolio Analysis & Reports
- Multi Asset, Global Coverage

Programming language: ReactJS, NodeJS, ExpressJS

Project: Agrud
Tools/Technologies:ReactJS, Redux

Tenure: AppSpace

Project Description: Platform for Financial Data, Content & Analytics Cloud Infrastructure for all Global Markets & Asset classes enabling Wealth Managers and Fintech's to access disparate data & content sources through an uniform API solution for faster time to market

Increase customer engagement by accessing tagged multilingual high quality content and alerts from multiple sources through a single API. Add our market factor based dynamic tagging to client risk profiles to improve personalization and therefore significantly increase customer lifetime value.

Programming language: ReactJS, NodeJS, ExpressJS
