Synopsis:

Highly seasoned and experienced (3.5Years) Mainframe Developer and hands-on experience in migration projects,with exceptional skills in all areas of software construction and programming. Adept at trouble shooting and ensuring quality control at every stage of management process. Able to function independently or as part of a team.

ProfessionalSummary:

- Excellent technical skills in mainframe technology with 3.5 Years of progressive experience in Bussiness Analysis, Development,Maintenance, Production Support on IBM Mainframe
- Successfully contributed with recent focus on **Mainframe Migration project**, demonostrting adaptibility and proficiency in transitioning legacy applications to modern platforms.
- Good experience in performing Unit testing of the modules developed.
- Worked extensively on **COBOL, DB2, JCL, VSAM and SQL.**
- Expertise in coding batch programs using **COBOL,VSAM and DB2.**
- Training level knowledge on **CICS & IMSDB.**
- Hands on experience in using version control tool **Endevor and other tools like FILE-MANAGER, CA-7 SPUFI and QMF.**
- Providing continous support to seniors and taking KT Sessions to juniors.
- Quick learner with ability to learn new things and takeup challenges, team player with good communications skills.
- Good understanding and knowledge on SDLC (Agile Methodology).
- Participated in post-incident reviews to identify root-causes and preventive measures.
- Handling abends occurred during monotoring production batch cycle which includes job executions and providing the temporary solution to the problem.
- Involved in low level design documents preparation.

AcademicQualifications:

- **BSC Computers** from **KRISHNA UNIVERSITY** with aggregateof 70% in 2019.

Work Experience:

- Currently Working as a Data Engineer for **QUANTIPHI** Bangalore From MAY-2024 TO TILL DATE.
- Worked as a System Engineer for **INFOSYS** Hyderabad From APRIL-2022 TO NOV- 2022.
- Worked as a Software Engineer for **TECH MAHINDRA**, Bangalore From SEP-2019 TO APRIL- 2022.

PROJECT -1

Client	DEFINITY
Team	Mainframe TO GCP Migration
Responsibilities	➤ Analysis on identifying the redefines clause in Copybooks ➤ Deep Understanding of Cobol - Db2 & Jcl Programs ➤ Set up and configure the target cloud environment. ➤ Oversee the technical aspects of the migration. ➤ Conduct Stakeholders meetings and gather requirement.
Duration	From MAY-2024 to Till Date
Key Skills	Mainframe, JCL, COBOL, DB2, VSAM, SQL & Data Migration
Description	The primary goal of the Mainframe Definity Migration Project is to migrate existing applications and data from traditional mainframe infrastructure to a modernized environment, typically leveraging cloud platforms or distributed systems. This migration is driven by the need to enhance agility, reduce operational costs, and improve overall efficiency in IT operations. Implementing migration strategies such as lift-and-shift, re-platforming, or re-architecting, depending on application requirements.

PROJECT-2

Client	AIG(AMERICANINTERNATIONALGROUP)
Team	AgentPayrollPayryte (SYNERGY LIFE TEAM)
Responsibilities	• Understand the existing programs • Code retrofitting for the existing copybooks and programs. • Prepared Internal Design Documents • Involved in Coding and unit testing • PreparedTest Plan Results • Involved on Review Activities • Resolving abends and updating the resolution in the repository • Meeting the SLA standards • Executing ad hoc tasks as per the client requirement • Sending consolidated reports and logs to client daily • Worked Production Support activities. • Incident and Change Order Resolution.
Duration	From SEP-2019 TO APRIL- 2022.
Key Skills	Mainframe,JCL,COBOL,DB2, Endeavor,SQL,VSAM
Description	ACT stands for Automated Claims transactions area Property and Casualty System (in the AIG Protection Technology - APT area). Our team handles every process related to claims. Every quarter we receive work requests for implementingimportant enhancements to keep the system in compliance with the customer's need and legal requisites. Our SDLCphase is implemented by

following waterfall model. Along with the work requests our project also involves production support activities. APP is a crucial bridge between the upstream and downstream systems as payments are being handled in APP and based on which the data and reports are sent to the downstream Systems. The Encompass book of business consists of about 1 million policy holders served by 3,000 independent agents and 1,200 claim adjusters.

Technical Skills:

Key Skills	: COBOL, JCL, DB2, VSAM, IBM Utilities, SQL
Operating System	: Z/OS (IBM Mainframe), TSO/ISPF, Windows.
Database	: SQL, DB2
Access Method	: VSAM
Mainframe Tools	: ENDEVOR, CA-7, QMF, SPUFI, FILE-AID
Migration Tools	: Mainframe Connector, Codex, Gen AI
Other Tool	: JIRA (Ticketing Tool).

Declaration:

I assure that all the above information declared by me is true to the best of my knowledge.
I am much interested to take up my career in your reputed organization.
