

Darshan CS

Software Engineer

Aspiring software developer with a robust foundation in **full-stack development and cloud technologies**, targeting opportunities in **software engineering and AWS cloud solutions** within dynamic and innovative organizations.

darshan55hml@gmail.com

+91 7975675135

CORE COMPETENCIES

AWS Cloud Architecture
API Design & Development
Full-Stack Development
Database Management
CI/CD Pipelines
Requirement Gathering
Software Development Life Cycle
Agile Methodologies

SOFT SKILLS

EDUCATION

- ❖ **Bachelor of Engineering in Computer Science**,
Jawaharlal College of Engineering, Shimoga, 2022

TECHNICAL SKILLS

- ❖ **Languages:** C#, .NET, HTML5, CSS3, SQL, Java
- ❖ **Frameworks & Libraries:** .NET Framework, ASP.NET Core, React, Angular, Web API, SpringBoot
- ❖ **Tools & Technologies:** Visual Studio, Visual Studio Code, Postman, MySQL, JIRA, GitHub, Git Copilot, Swagger

CERTIFICATIONS

- ❖ FullStack Development, Mindtree
- ❖ AWS Cloud Practitioner, AWS

PERSONAL DETAILS

- ❖ Address: Shimoga, Karnataka, India
- ❖ Date of Birth: 9th December 2000
- ❖ Languages Known: English, Hindi, Kannada

PROFILE SUMMARY

- ❖ **Accumulated 2.5 years** of comprehensive experience in **software development**, specializing in **full-stack solutions and cloud technologies**, with a focus on delivering **high-quality applications in the tech industry**.
- ❖ Currently working as a Software Developer at First American India, designing and implementing **scalable software solutions** that enhance **operational efficiency and user experience**.
- ❖ Developed a strong skill set in various **programming languages and frameworks**, including **C#, .NET, and Java**, while also gaining expertise in **cloud technologies and API development throughout the career journey**.
- ❖ Achieved significant improvements in **application performance and reliability** by successfully **integrating OpenSearch into existing systems**, resulting in enhanced **data handling capabilities and real-time analytics**.
- ❖ Established exceptional **problem-solving capabilities and effective communication skills**, fostering **collaboration within cross-functional teams** to drive project success and meet tight deadlines.
- ❖ Possess in-depth knowledge of **cloud computing principles and practices**, particularly in deploying applications on **AWS**, which facilitates the creation of **robust and scalable software solutions**.
- ❖ Knowledgeable in **modern software development methodologies**, including **Agile and DevOps practices**, which streamline project workflows and enhance team productivity.
- ❖ Proficient in **both front-end (React, Angular) and back-end (ASP.NET Core, Web API) technologies**, with a strong understanding of **full-stack development and UI/UX best practices**.

WORK EXPERIENCE

- | Software Developer First American India, Bangalore | Aug 2022 – Present |
|--|--------------------|
| ❖ Leading the development of high-performance APIs using C#, .NET Core, and Web API, enhancing application efficiency and reducing response times for end-users. | |
| ❖ Driving the migration of background jobs and APIs into AWS Fargate and EKS containers, optimizing cloud infrastructure, and improving scalability for mission-critical applications. | |
| ❖ Integrating OpenSearch for real-time log analytics and application monitoring, improving system performance and enabling the handling of large-scale data with minimal latency. | |
| ❖ Modernizing legacy systems by shifting to a microservices architecture in AWS, resulting in greater system flexibility, faster release cycles, and enhanced team collaboration. | |
| ❖ Collaborating with cross-functional teams to design and implement dynamic user interfaces using React and Angular, boosting user experience and front-end performance. | |

PROJECTS UNDERTAKEN

- | API Development |
|--|
| ❖ Designed and developed secure, robust, and reliable APIs using C# and .NET Core, enabling the rapid development of innovative applications that enhance business capabilities. |
- | AWS Modernization |
|---|
| ❖ Led the migration of background jobs and APIs to AWS Fargate and EKS containers, improving scalability, performance, and resource utilization in a cloud-native architecture. |
- | AWS OpenSearch Integration |
|--|
| ❖ Implemented a distributed, open-source search and analytics suite using OpenSearch for real-time application monitoring, log analytics, and website search, resulting in improved system performance and data accessibility. |
