ACADEMIC PROJECTS

Netflix Movies and TV Shows Clustering (06/2022 - 07/2022)

- Netflix Uses AI-powered algorithms to make predictions based on the user's watch history, demographics, ratings, and preferences.
- Implemented K-means clustering to categorize 7.7K TV shows and movies into 26 different clusters, which helped garner insights into Netflix content consumption.
- Employed NLP techniques such as stemming, stopword removal, and vectorization.
- Evaluated the optimal clusters using the Silhouette score and the Elbow method to validate the intercluster separation and intra-cluster similarities.

E-commerce Sales Analysis Dashboard Development (05/2023 - 06/2023)

- Developed an interactive E-commerce Sales Analysis Dashboard using Power BI.
- Provided comprehensive insights into sales, quantity, profit, and customer data.
- Enabled users to analyze sales performance at various levels of granularity, including state-wise sales and sub-category profitability.
- Facilitated examination of monthly sales quantity by category and customer-specific sales information.

Data Science Job Salary Analysis Dashboard (08/2022 - 09/2022)

- Developed an interactive Tableau dashboard analyzing data science job salaries from 2020 to 2022.
- Provided detailed insights into salary trends based on work experience, employment type, job title, company location, and company size.
- Enabled easy analysis of sales performance by visualizing key metrics such as revenue, quantity, and profitability.
- Allowed users to drill down into data for deeper insights, including state-wise sales and sub-category profitability.
- Provided customizable views for examining monthly sales quantity by category and analyzing customer-specific sales information.

TECH STACK

Expertise in Languages & Tools (x/5)

SQL - 5 || Python - 5 || Tableau - 4 || Excel - 4 || PowerBI - 4.5 || GitHub - 4 || Web Scrapping - 4

Platforms

Mysql • Jupyter Notebook • PostgreSQL • VS Code • Google Colab • Anaconda

ML Framework

Scikit-Learn • Pandas • NumPy • Matplotlib • Seaborn • NLTK • Streamlit

ACHIEVEMENTS

Silver Badge in Python and SQL
HackerRank

WORK EXPERIENCE

Data Analyst Ambient.AI

08/2023 - Present

Bangalore, Karnataka

Skills: SQL, Grafana

- Spearheaded the development of a dynamic threat analysis dashboard utilizing Grafana as the visualization platform, providing real-time insights into security events and incidents.
- Employed SQL expertise to craft efficient and effective queries, ensuring optimal performance and accuracy in real-time data analysis.
- Developed expertise in quickly assessing visual data to determine the presence of anomalies or suspicious activities.

Associate Data Engineer 4crisk.ai

03/2023 - 06/2023

Bengaluru, Karnataka

Skills: Python, SQL, Django, Excel, PDF Parsing, Web Scrapping, Gitlab.

- Extracted data from various sources like PDF, HTML, XML, and JSON using scraping and parsing techniques.
- Built HTML crawlers for various US state regulations according to different use cases.
- Managed data extraction and transformation to generate meaningful data which can be consumed by the application
- Expertly handled massive datasets and implemented scalable solutions for ML/AI model training

TRAINING EXPERIENCE

Data Science Trainee - Almabetter (02/2022 - 02/2023)

Skills: Python, SQL, Excel, Supervised ML, Unsupervised ML, Tableau, Data Extraction, Data Analytics

Algorithm Development using Machine Learning - Verzeo (03/2021 - 06/2021)

Skills: Python, SQL, Machine Learning, Data Analysis

EDUCATION

B.Tech in Information Technology SRM University, Chennai

CGPA - 9.2 || 2018-2022

XII-Higher Secondary

Maharashtra Vidyalaya Khaperkheda

Percentage- 56 || 2017-2018
