Education

Veer Narmad South Gujarat University - Surat

Oct. 2021 – Apr. 2024

Bachelor of Computer Applications (B.C.A)

8.5/10.00

Ashadeep Vidhyalay

June 2019 – May 2021

Higher Secondary Certificate (H.S.C.) in Commerce

GPA – 83.42

Experience

Daski Career Management LLP (CareerWale)

Oct. 2024 - Present

Backend Intern

Bengaluru, karnataka

- As a Backend Intern at CareerWale, I develop and maintain backend APIs using Django REST Framework and PostgreSQL for Admin and Partner panels, streamlining data management processes.
- Optimizing API performance and database management to ensure seamless data flow and scalability. Collaborating with cross-functional teams to deliver efficient and scalable backend solutions aligned with business goals.

Projects

Student Registration and Authentication System (SRAS) | Django REST Framework, PostgreSQL, JWT

- Developed "StudentApp," a backend system for student registration and authentication, using Django REST Framework to create RESTful APIs with PostgreSQL for secure data management.
- Integrated JWT-based authentication to ensure secure, tokenized access control, enabling protected routes for authorized users. Delivered complete functionality for user registration and login, prioritizing data security and efficiency.
- Demonstrated expertise in backend development, API security, and scalable database integration aligned with industry standards.

Unwind - Depression Relief App | SQL, Firebase, Java, XML

- Led the development of "Unwind," a major academic project aimed at supporting individuals dealing with depression.
- The app was created using XML for the front-end, Java for the back-end, and Firebase for the database. Key features include mood tracking, daily journaling, music therapy, guided meditation, chat bot support, and expert consultations.
- As the Database Architect, I designed an efficient and secure database structure to manage user data and ensure smooth app performance.

Gym Management System | PHP, HTML, CSS, MySQL

- As part of a minor project, the system includes two distinct panels: a user panel for member registration, login, and profile management, and an admin panel for managing memberships, adding plans, and overseeing trainer details.
- I contributed to the design and implementation of the authentication system, ensuring secure access and data management.

Technical Skills

Languages: Python, JavaScript, HTML, CSS

Technologies/Frameworks: Django REST Framework (DRF)

Databases: Oracle SQL, PostgreSQL

Tools: Git/GitHub, Postman

Relevant Coursework

- Python Programming
- Web Development
- C/C++ Programming
- Django Framework
- SQLite
- Campus to Corporate Training
