Mobile: +91- 7353783295

E-mail ID: darshandarshu00007@gmail.com

PERSONAL PROFILE

Father's Name : Mr. Narayan N
Mother's Name : Mrs. Rekha CR
Date of Birth : 23-04-2003
Gender : Male
Marital Status : Single
Place of Birth : Shimoga
Blood Group : A +
Religion : Hindu
Nationality : Indian

CURRICULAM VITAE

OBJECTIVE

Interested to work in a challenging and learning atmosphere, which should give me an opportunity to deliver the best out of me. My greatest asset is my sincerity, honesty, which keeps me going.

PROFESSIONAL RECORD

SSLC

Year : 2018

Percentage : 60.00 %

Specialization: SSLC

School : Shree Ayyappa English Medium High School

Higher Secondary Course (Diploma)

Year : 2021

Percentage : 67.00 %

Specialization: E & C

College : PES Polytechnic

DEGREE

Year : 2024

CGPA : 6.3

Specialization: E & C

College : JNNCE, Shivamogga

Board : VTU

INTERESTS

- *Reading News Paper*
- *Watching TV*
- *Listening Music*
- *Travelling.*
- *Swimming.*
- *Chatting*

PERSONAL STRENGTHS

- *Co - operative*
- *Creative Thinking*
- *Hard working*
- *Sincerity*
- *Punctual*
- *Discipline*

Language knows

- Kannada
- English
- Hindi

SKILLED IN

- Better Communication Skill.
- Better Customer Handling.
- Project Management.
- Leadership.
- Decision Making.

Skills

- AWS, Azure
- Ansible
- Jenkins
- Docker
- Git and GitHub
- Bash and Python
- Grafana
- Prometheus

CERTIFICATES:

- Devops Engineer
- Devops with AWS Cloud

Internships:

- Embedded System and IOT(Inventron)

Project:

- **End to End CICD Implementation – Jenkins**
Implemented an end to end CI/CD pipeline for java based application using Jenkins , Implemented various stages such As Build , SCM , Docker images , Deployment on Kubernetes platform
- **Implemented Three Tier Architecture - AWS**
Implemented highly available and scalable using Terraform and deployed the application on EC2 Instances
- **Configuration Management - Ansible Managed**
configuration of multiple Linux Instances using Ansible
- **Finance Me (Banking and Finance domain) Efficient CI/CD Pipeline:**
Developed and managed a robust continuous integration and deployment pipeline using Git, Maven, Jenkins, and Docker. Automated Infrastructure Provisioning: Utilized Terraform to provision and manage infrastructure as code, creating reliable and consistent environments. Configuration Management: Automated configuration management using Ansible for seamless deployments. Real-Time Monitoring: Implemented Prometheus and Grafana for comprehensive monitoring and visualization, ensuring proactive issue detection and resolution
- **suspicious action detection in intelligent surveillance system using action attribute modelling.**
The application was tested on many publicly available and custom-made videos, achieving accuracy comparable to most contemporary systems while running in real time on modest hardware. It had a very low rate of false positives, using the same methods and parameters across all videos with only minor adjustments. Even better results are possible with more extensive testing and fine-tuning. The initial implementation uses simple, easy-to-execute methods due to time and resource constraints. However, the system's modular design allows for the addition of more advanced methods, making it a strong foundation that can be easily adapted to perform well in various scenarios.
- **IMAGE CLASSIFICATION USING CNN**
The image classification using CNN (Convolution Neural Networks) is to accurately assign predefined labels or categories to images based on their visual content.
