Summary

Aspiring Data Scientist with hands-on experience in building and deploying machine learning models, particularly focused on predictive analytics. Skilled in Python, SQL, data visualization, and model deployment. Seeking a challenging data science role where I can apply my expertise in data-driven problem-solving and contribute to impactful projects.

Skills

Python, SQL, Data Science, Machine Learning, Data Visualization, Data Analysis, Azure, Hadoop, Spark

Experience

AI VARIANT

Data Scientist Intern

06/2024 - 09/2024

- **Project Objective:** Predict solar power generation using environmental variables like temperature, humidity, and windspeed.
- **Data Source:** Utilized a dataset containing weather and solar power generation data (solarpowergeneration.csv).
- **Exploratory Data Analysis (EDA):** Analyzed data trends, distributions, and correlations between environmental variables and power generation.
- **Feature Engineering:** Renamed and transformed columns (e.g., temperature, humidity, windspeed) to enhance model performance.
- **Modeling:** Built a regression model using **RandomForestRegressor** to predict solar power output.
- **Model Evaluation:** Assessed model accuracy using metrics such as RMSE, MAE, and R².
- **Deployment:** Developed a Streamlit app to deploy the model for real-time solar power generation prediction.
- **Tools:** Python (Pandas, NumPy, Scikit-learn), Matplotlib, Seaborn, Streamlit.

Polycab India limited

Assistant Manager • DELHI

10/2023 - 09/2024

- Exceeded secondary sales targets by 15% through strategic planning and execution
 - Successfully established distribution channels, surpassing the target by 20%
 - Achieved 95% distribution of front-runner SKUs, exceeding the set targets
 - Surpassed new outlet opening targets by 25%, thereby expanding market presence
 - Enhanced beat adherence by 20% and market working time by 25% to drive secondary working input parameters
 - Boosted outlet productivity by 30% and achieved a 20% increase in the depth and width of successful calls as part of secondary working output parameters
 - Implemented strategies to drive secondary sales growth and market expansion
 - Improved outlet productivity and call efficiency to meet and exceed performance targets
-

Certificates

DATA SCIENCE, C AND C++, WEB DEVELOPMENT

Education

Guru Tegh Bahadur Institute Of Technology
