Professional Summary

Experienced Data Engineer with around 3 years of expertise in designing scalable ETL pipelines, cloud-based platforms, and real-time analytics solutions using Azure and big data technologies.

- Proficient in **Azure Data Factory (ADF), Databricks, and PySpark**, building optimized data workflows with Delta Lake for ACID transactions and large-scale dataset processing.
- Skilled in real-time data streaming using **Azure Event Hub** and Stream Analytics, enabling actionable insights from continuous data streams.
- Expertise in SQL databases (**Azure SQL, MySQL, Delta Lake**), with strong skills in query optimization and data modeling.
- Hands-on experience in workflow automation and orchestration with **Logic Apps, Azure Functions, and Linux** scripting, achieving significant efficiency improvements.
- Proficient in **CI/CD pipelines using GitHub** and Azure DevOps, ensuring seamless deployments and robust version control.
- Adept at monitoring and maintaining pipeline reliability using tools like **Control-M, Grafana, and Azure Monitor**.
- Strong domain expertise in telecommunications, delivering predictive maintenance and customer analytics.
- **Certified Databricks Data Engineer Associate and Microsoft Azure Data Engineer Associate (DP-203).**

Skills

- **ETL Tools:** Azure Data Factory (ADF), Databricks, Control-M
- **Programming & Querying:** PySpark, SQL, MySQL, SparkSQL
- **Cloud Platforms:** Azure Cloud Services (Azure Storage, Logic Apps, Function Apps), Databricks
- **Version Control & CI/CD:** GitHub, CI/CD Pipelines
- **Monitoring & Task Automation:** Grafana, JIRA
- **Scripting Tool:** Linux
- **Database Technologies:** Azure SQL, Hive

Certifications

1. Databricks Certified Data Engineer Associate
2. Microsoft Certified: Azure Data Engineer Associate(DP-203)
3. Microsoft Certified: Azure Fundamentals (AZ-900)
4. Microsoft Certified: Azure Data Fundamentals (DP-900)
5. AWS Certified Cloud Practitioner

Professional Experience

Organization : Wipro Technologies, Bengaluru

Designation : Project engineer | Azure Data Engineer

Tenure : March'2022 – Present

Projects Summary

Client: T-Mobile, USA

Duration: 07/2022 – till date

Title: Project Engineer

Role: Data Engineer

Environment Details: Control-M, Databricks, Delta lake, Delta Tables ,Pyspark, Hive, Hadoop, JIRA, ADF, Azure Cloud

Details:

T-Mobile US, Inc., often shortened as T-Mobile, is an American wireless network operator headquartered in Bellevue, Washington, U.S. T-Mobile US is the third-largest wireless carrier in the United States, after Verizon and AT&T, with 31.43% of the market share as of June 13, 2024.

Roles & Responsibilities:

- Data Platform Development: Designed and implemented scalable ETL pipelines using Azure Data Factory and Databricks to process and manage high-volume datasets.
- Data Lake Management: Optimized data handling with Delta Lake and HiveQL, ensuring efficient data ingestion and storage across distributed systems.
- Real-Time Data Integration: Automated workflows with Logic Apps and Function Apps to improve integration efficiency, reducing processing time by 80% through PySpark and Linux scripting.
- ETL Optimization: Developed and monitored ETL processes using Control-M and Grafana dashboards to maintain system reliability and address issues proactively.
- Data Governance: Ensured data accuracy and compliance through robust data modeling and query optimization using SQL and SparkSQL.
- Collaboration & Version Control: Used GitHub for version control and implemented CI/CD pipelines to streamline deployment and enhance collaboration across teams.
- Cross-Team Contributions: Partnered with diverse stakeholders to resolve escalations, ensure SLA-aligned solutions, and deliver key insights through JIRA-based incident management.

Academic Qualification

M S Ramaiah university of Applied sciences, Bengaluru | 2017-2021

Major: Aerospace engineering | CGPA: 7.65

Personal Information

Date of Birth : 10 November 1999

Language Known : Kannada, English, Telugu, Hindi
