

DEEPA D BHAT

Automation Test Lead

Ph: +91 9741428645

Bengaluru, India

Email: deepadbhat5@gmail.com

PROFILE

Results-oriented and innovation-driven QA Lead with **13+** years of experience in automation strategy, UI/API test frameworks, and team mentorship. Adept at driving quality engineering initiatives and implementing robust automation. Seeking a challenging Lead position to leverage my expertise in Selenium, C#, Java and API testing to lead high-impact projects, optimize QA processes, and contribute to continuous delivery excellence and product reliability.

TOOLS AND TECHNOLOGIES

- **Automation Tools:** Selenium WebDriver (C# with SpecFlow(BDD)), Rest Assured, TestNG, NUnit, Mocha + Chai, WinAppDriver
- **Development & IDEs:** Eclipse, VS Code, Visual Studio
- **API Testing & Utilities:** Postman
- **Language:** C#, Java, JavaScript
- **Test Management Tools:** HP QC, JIRA, TestRail, Jama
- **CI/CD Server/Tool:** Jenkins, TeamCity
- **Database:** MSSQL Server, ORACLE DB, MongoDB
- **Browsers:** Windows [IE, Edge, Mozilla, Chrome]
- **Methodologies:** Agile, Scrum

EMPLOYMENT HISTORY

Lead Software Engineer II,

Beckman Coulter (Danaher Corp) - Leica Microsystem..... July 2022 – Present

➤ **Product:** Neurosurgical Microscope

Project: ARveo, Jura

Role: Automation Test Lead / Scrum Master

Duration: 3 Years

- Developed and maintained robust UI automation frameworks for Web Application using Selenium with BDD Cucumber + TestNG framework, increasing test efficiency and accelerating release cycles

- Integrated UI automation scripts with microscope-based applications using TeamCity CI, improving test execution speed by 40%.
- Led knowledge-sharing sessions and coached team members on automation strategy, promoting consistency, scalability, and adherence to industry best practices.
- Assisted in test execution and release documentation efforts, ensuring deployment accuracy and minimizing post-release issues.

Module Lead,

Tech Mahindra Ltd..... Nov 2016 – July 2022

➤ **Project:** Connected Risk

Client: Empowered Systems

Role: Automation Lead

Duration: 11 Months

- Collaborated with product owners and developers to analyse user stories and validate acceptance criteria through functional testing.
- Engaged in all key Agile ceremonies—scrum calls, backlog refinement, sprint planning, reviews, and retrospectives—to ensure alignment with sprint goals and team objectives.
- Created and implemented test cases for API testing using Postman and RESTful APIs to validate functionality.

➤ **Project:** Eikon

Client: Refinitiv (LSEG)

Role: Automation Lead

Duration: 4.5 Years

- Automated key functional test cases using Typescript using WebdriverIO framework accelerating test execution.
- Supported software code reviews to ensure code quality and adherence to standards.
- Managed team resources effectively to deliver sprint goals within agreed timelines, maintaining high productivity and quality.
- Led a QA team and conducted training sessions on automation best practices.

Test Analyst,

Infosys Technologies Limited..... Sep 2011 – Nov 2016

- **Project:** Prosource
Client: Schlumberger (SLB)
Role: Automation Engineer
Duration: 3 months
 - Maintained a robust TestComplete automation framework using VBScript for comprehensive UI and functional testing of Windows desktop applications.
 - Worked closely with QA and development teams to analyse user flows and application behaviour, translating them into actionable test automation requirements.
- **Project:** Secure Checkout, F&EC and OS (Order Summary)
Client: Nordstrom, Inc.
Role: Automation Engineer
Duration: 4.1 Years
 - Created robust automation scripts using Selenium WebDriver and Selenium IDE, adhering to industry coding standards for efficient test execution and maintainability.
 - Executed complex SQL queries to validate backend databases and ensure data accuracy during QA testing
- **Project:** SST (Sysco Sourcing Tool)
Client: Sysco
Role: Test Engineer
Duration: 3 months
 - Participated in requirement analysis, test design (scenarios, cases, data), and executed end-to-end functional testing using HP QC and SST tool; reported defects through HP Quality Center.
- **Role:** Systems Engineer – Trainee
Duration: 6 months
 - Established a solid foundation in C# through a professional training program, enhancing object-oriented programming skills, demonstrating knowledge of software development.

EDUCATION

- B.Tech in Computer Science – April 2011
CETKR, CUSAT University, Kerala

ACCOMPLISHMENTS

- Received Special Recognition Award (2024) & Spot Award (2023) for outstanding contribution to test automation, demonstrating excellence in improving test efficiency and quality.
- Received Associate Consistency Excel (ACE Award 2021) in recognition of outstanding performance, significant contributions, and positive impact on team success.
- Received Pat on the Back (2017 & 2020) Award for continuous improvement and unwavering dedication to quality and team goals.
- Earned 'Most Valuable Player' title (2014) in F&EC project for finding most critical scenarios and bugs.
