PROFESSIONAL SUMMARY:

- I have total 3.6 years of Experience as Software Developer in C++.
- 18 months of experience in the field of hybrid application development for both Android and Web.
- Proficient with Flutter, Dart, Android Studio, SQLite.
- Strong optimization and debugging skills.
- Worked with team members on server-side integration.
- Collaborated with the design and development team on direction and user experience.
- Experience with development of UI with Interface builder as well as custom UI development
- Experience on web service integration (**REST, JSON, Social Networking [Facebook and Google SignIn Integration]**).

EXPERIENCE SUMMARY:

- Worked as a **Flutter Developer** in **PPILForce Technology Services pvt. Ltd., Hyderabad.**

Tenure: December 2023 - Present

- Worked as a **Flutter Developer** in **Infosquare Communications pvt. Ltd., Hyderabad.**

Tenure: May 2023 - November 2023

- Worked as a Software Developer in **Jytra Technology Solutions pvt.ltd., Rajahmundry.**

Tenure: February 2021 - March 2023

ACADEMIC SUMMARY:

- B.Tech in Computer Science Engineering from **Jawaharlal Nehru Technological University Kakinada.**

TECHNICAL SKILLS:

Language : Dart.

Database : Sqlite.

SDK : Flutter SDK.

I.D.E : Android Studio.

Operating Systems: Windows Xp.

PROJECT#1:

Title : PPLForce Task Planner

Environment : Flutter, Android Sdk.

Role : Team Member

Project Description:

A task management platform inspired by Jira, enabling users to create, assign, and track tasks throughout their lifecycle. The application provides features for task creation, monitoring, status updates, and user collaboration.

Roles & Responsibilities:

- Designing the views using interface builder.
- Understanding the Business Requirements.
- Communicating with the client and developing the application requirement.
- Involved in the UI Design and implementation of code.
- Involving development of data delegate coding, Making connections and Application Coding using Flutter.
- Test the application on device and distribute applications.

PROJECT#2:

Title : BGV

Environment : Flutter, Android Sdk.

Role : Team Member

Project Description:

A comprehensive platform enabling seamless background verification for candidates. The application allows candidates to fill in their details and submit them for verification, while providing tools for verifiers to review and validate the information.

Roles & Responsibilities:

- Designing the views using interface builder.
- Understanding the Business Requirements.
- Communicating with the client and developing the application requirement.
- Involved in the UI Design and implementation of code.
- Involving development of data delegate coding, Making connections and Application Coding using Flutter.
- Test the application on device and distribute applications.

PROJECT#3:

Title : Jhoice

Environment : Flutter, Android Sdk.

Role : Team Member

Project Description:

Jhoice is an application where you can book any service like mechanic, electrician, plumber etc., near your area. Also you can add your business listed in the app.

Roles & Responsibilities:

- Designing the views using interface builder.
- Understanding the Business Requirements.
- Communicating with the client and developing the application requirement.
- Involved in the UI Design and implementation of code.
- Involving development of data delegate coding, Making connections and Application Coding using Flutter.
- Test the application on device and distribute applications.

PROJECT#4:

Title : Ticket it

Environment : Flutter, iPhone Sdk, Android Sdk, MAC OS X.

Role : Team Member

Project Description:

Ticket it is a hybrid application which is used to book tickets, and check the status of bookings, confirmation of tickets etc...

Roles & Responsibilities:

- Designing the views using interface builder.
- Understanding the Business Requirements.
- Communicating with the client and developing the application requirement.
- Involved in the UI Design and implementation of code.
- Involving development of data delegate coding, Making connections and Application Coding using Flutter.
- Test the application on device and distribute applications.

PROJECT#5:

Title : AppLoadDialog Box

Environment: Visual C++.

Role : Team Member

Project Description:

Appload is used to load the customized programs developed by the users. In that MySuite is one of the options to store the previous programs run by the users.

Roles & Responsibilities:

- Designing the views using interface builder.
- Understanding the Business Requirements.
- Communicating with the client and developing the application requirement.
- Involved in the UI Design and implementation of code.
- Involving development of data delegate coding, Making connections and Application Coding using Visual C++..
- Test the application on device and distribute applications

DECLARATION:

I hereby declare that above mentioned particulars are true to the best of my knowledge and belief.
