PROFILE SUMMARY

- An accomplished technocrat with **over 3+ years of experience** in DevOps processes, Automation, and Configuration Management with expertise in different software development platforms using build-and-release management tools.
- Have **AWS** exposure in Build and Release Management, setting up and maintaining **CI & CD pipelines**, and delivering releases for multiple applications running **Linux** and Ubuntu-based distributed infrastructure.
- Proven competency in handling the entire project lifecycle from inception to delivery, including requirement analysis, design, development, testing, test case preparation, and implementation using SDLC and Agile methodologies.
- Experience in providing infrastructure by using **Terraform**.
- Hands-on Experience in creating **Docker** Images and running Docker Containers. **Creating Docker files** for different environments and configuring Docker private registries to maintain Docker images.
- Hands-on experience in provisioning the **AWS EKS** cluster with **Terraform** and maintaining the docker images on Docker Hub Private Repo.
- Hands-on experience working with **AWS** like EC2, VPC, S3, Route53, ELB, IAM, Security Groups, Lambda, Cloud Watch, RDS, KMS Keys and EKS over Terraform.
- Writing **Ansible playbooks** for task automation.
- A motivational management style with a proven record of managing resources, and driving Project objectives by mentoring, motivating, and encouraging teams to surpass defined goals.

WORK EXPERIENCE

SEP 2023 - Present

DevOps Engineer

Cloud Vision Technologies, Hyderabad

PROJECT EXPOSURE

Client: MC Donalds
Role: DevOps Engineer
Industry: E-Commerce

Environment: Git, GitHub, Jenkins, Docker, Kubernetes, AWS, Python, SonarQube, Terraform, Maven, Ansible, Jira

Roles and Responsibilities:

- Build/Release and DevOps methodologies and setting up and maintaining **CI & CD** pipelines and delivering releases for multiple applications running on Linux and Windows based distributed Infrastructure.
- Developing and implementing software release management strategies for various applications according to the Agile Process.
- Automated build and deployment process with **Jenkins and Maven**, eliminating of manual work and configure various plugins for Jenkins.
- Extensively worked with Version Control Systems like GIT, **GitHub, GitLab**.
- Work experience on GitHub maintaining the Source Code in various environments.
Experience on **AWS Cloud Platform** such as EC2, Security Group, S3, VPC, Route53.
- Good experience on creating and managing the Kubernetes clusters.
- Development of **Ansible Playbooks**, Roles to manage systems configuration Application.
- Deployment and environment configuration using **Docker**.
Having experience and good knowledge on code as infrastructure using **Terraform**.
- Good Experience in EKS Installed Prometheus using Helm Charts in EKS and also has setup **Grafana** get the metrics from **Prometheus**.
- Using Argo CD for Application definitions, configurations, and environments should be declarative and version controlled. Application deployment and lifecycle management should be automated, auditable, and easy to understand.
- Responsible for deploying and monitoring application log files using Application deployment and maintenance.

TechMahindra, Bengaluru Client: MC Graw Hill Duration: Dec 2021- Jul 2023 Role: Software Engineer.	Environment: Git, GitHub, Maven, SonarQube, Jenkins, Docker, Kubernetes, AWS, Terraform Roles and Responsibilities: • Strong expertise implementing CI CD Pipelines for multiple applications and great hands-on experience with Jenkins. • Maintaining Docker Container Clusters managed by Kubernetes, Linux, GIT Bash, Docker. • Experience on AWS Cloud Platform such as EC2, Security Group, S3, VPC, Route53. • Perform Deployment of War files in Tomcat Application servers using ShellScript. • Configuring quality gates and quality profiles, as per client's requirement in Code Quality tool SonarQube and generating HTML report for the projects. • Set up of Application environment which includes installation of products like Apache Tomcat server on UNIX, Linux and Windows platform. • Application Deployment and environment configuration using Docker. • Having experience and good knowledge on code as infrastructure using Terraform. • Experience in Helm Charts development and deployment. • Experience in implementing DevOps Pipelines for CICD.

EDUCATION

2017-2021	Jawaharlal Nehru Technological University , Anantapur
-----------	---

TECHNICAL SKILLS

	Operating system	Linux, Windows,Ubuntu
	Version Control Tools	Git, GitHub
	Quality Management Tools	SonarQube
	Application Server	Tomcat
	CI/CD Tools	Jenkins
	Build Management Tools	Maven
	Containerization Tools	Docker
	Orchestration Tools	Kubernetes, EKS
	Cloud Services	AWS, Azure (Basic)
	Configuration Management Tools	Ansible
	Infrastructure as a Code (IaC)	Terraform
	Programming Languages	Python, Shell
	Monitoring Tools	Prometheus, Grafana
	Tracking Tools	Jira
