Summary

Results-oriented System Engineer with 2 years of experience in managing and transforming extensive datasets using SQL, Python, and Excel. Proficient in creating interactive dashboards and reports with Power BI to track KPIs, driving data-driven decision-making. Experienced in automating data pipelines through SQL queries, resulting in a 30% efficiency enhancement. Skilled at manipulating and transforming data using DAX and Power Query. Adept at presenting meaningful insights to stakeholders. A Bachelor of Technology graduate from R C Patel Institute of Technology with a strong foundation in data analysis, Python, SQL databases, and data visualization. Seeking a challenging position where my expertise in data analysis and visualization can drive strategic business decisions.

Experience

Infosys

Pune, India

Systems Engineer

10/2022 - 11/2024

- Managed data collection, cleansing, and organization of extensive datasets using SQL, Excel, and Python to ensure precise and uniform data across multiple departments
- Created interactive dashboards and reports using Power BI to track key performance indicators (KPIs), providing valuable insights into business performance and enhancing data-driven decision-making
- Automated data pipelines and reporting processes through SQL queries, resulting in a 30% efficiency enhancement and significant reduction in manual effort
- Utilized DAX (Data Analysis Expressions) and Power Query to manipulate and transform data from various sources
- Transformed raw data into meaningful insights and presented them to stakeholders in an intuitive way
- Created custom reports and visualizations using SAS PROC REPORT to deliver key insights to business stakeholders
- Used SAS/SQL to perform data extraction, manipulation, and analysis of large datasets from multiple sources

ACADEMIC PROJECTS

Heart Disease Prediction Using Machine Learning

- This project aims to develop a machine learning model that predicts the likelihood of heart disease based on various health factors. The model will analyze patient data to high-risk individuals, enabling early intervention and prevention.

Bank Management System

- The bank management system is a software application designed to automate and manage the daily operations of a bank. The system enables bank employees to efficiently manage customer accounts, transactions, loans and other banking services.

Skills

Technical Skills: Power BI • MYSQL • SAS Programming • Python • Amazon Web Services • Spark • Big Data

Analytical Skills: Data Analysis • Data Extraction • Data Manipulation • Business Intelligence

Certification

Microsoft certified azure fundamentals

Education

RC Patel Institute of Technology

Bachelor Of Technology, Computer Engineering

07/2018 - 07/2022
