SUMMARY

Electrical and communication graduate seeking an entry-level role in Robotic Process Automation (RPA). Looking to join a dynamic team to apply skills and grow professionally in the field of automation.

SKILLS & ABILITIES

UiPath Skills: Currently learning through UiPath Academy, with knowledge of key concepts such as Excel automation, email automation, UI automation, exception handling, control flows etc. Developed processes in UiPath Studio as part of the learning experience and gained familiarity with UiPath Orchestrator.

Python – has basic knowledge in python programming language.

ACADEMIC PROJECTS

Metro gate access using face recognition : The proposed method is AI face recognition which is foolproof. This is an innovative and secure system designed to enhance the efficiency and security of metro or subway systems. It involves capturing and analyzing facial features to grant or deny access to metro stations.

Automatic railway gate control system : In order to avoid accidents at railway crossings, developed a simple system, which automatically closes the level crossing gates during the train's arrival and then the gates are opened automatically when the train passes by.

EDUCATION

Btech in Electronics and Communication Engineering | Mahaguru institute of technology |

2020 – 2024 | CGPA 7.3

HSLC | Amrita HSS Vallikunnam | **2020** | 87.4 %

SSLC | VVHSS Thamarakulam | **2018** | 89 %

UIPATH USE CASES

Excel Automation- Created an automation process as part of learning which extracts employee data from excel file into data table and filters employees based on certain criteria and writes back into new excel file.

Unicorn Name- Created a process as part of learning to read data from excel sheet and populate fields on webpage and generate Unicorn name. This value will be send via email to designated address.

EXPERIENCE

Intern at KELTRON, Trivandrum (May 2023 - May 2023)

- Introduction to IoT, computer Network, Microprocessor, Microcontroller, Introduction to Development Board & Its Types, IoT Devices, Sensors & Actuators, ESP32 .
- Completed certificate course in “Successful negotiation: essential strategies and skills” from University of Michigan virtually.
