CAREER GLANCE

RPA Developer with **overall 3.5+ years of experience** working in tech industry and having **3+ years of working experience in Robotic Process Automation. Automation Anywhere 360 Certified Advanced RPA Professional.** Having hands-on experience in **UiPath Studio, RE-Framework, Orchestrator, LINQ Queries, AA360**, Automated end to -end **attended and unattended bots**.

PROFESSIONAL SUMMARY & RESPONSIBILITIES

- Responsible for **the implementation of RPA life cycle**: Business process feasibility analysis, RPA high level assessment, Business process documentation (gather requirements from business team), solution design, bot development, unit test, UAT Testing, production deployment, hyper care, support and monitoring.
 - Created **the BRD (business), PDD (process), SDD (solution)**, to be flow, process mappings.
 - Worked across all phases (**plan, Analyze, Design, build and test**), with the team of developers in **an agile** scrum environment.
 - **Communicating with cross functional technology teams** and design teams to ensure consistent, beneficial, client interaction and solution delivery.
 - Provided **post GO Live support throughout the Stabilization phase**.
-
-

SKILLS

- **TECHNOLOGIES**: Automation Anywhere AA360, UiPath, VBA Excel Macros, LINQ, VBScript, C++, python, C#
 - **UiPath- RE-Framework (Robotic Enterprise Framework)**, Excel automation, Email automation, Web (UI Automation), Orchestrator, LINQ Queries, OCR, Document Understanding (Document Automation).
 - **Applications Used**: ERP Tools, SAP Application, SAP Ariba, Boicing Application, Microsoft Applications (Office, Excel, PowerPoint, Access) and other web applications for automation.
 - **Database**: MS SQL
-
-

CERTIFICATION:

- **Automation Anywhere 360 Certified Advanced RPA Professional**
-
-

ACADEMICS

- **B.E- Computer & Science and Engineering 2020** from *Madras Institute of Technology, Anna University* with **8.7 CGPA**.
 - Class 10- St Johns Matriculation School in Chennai 2014 with **96.6%**
 - Class 12- St Johns Matriculation School in Chennai 2016 with **93.25%**
-
-

WORK EXPERIENCE:

PROJECT PROFILE: HCL-CFO (Finance & Payroll)

Period: November 2024 - Present

Client: HCLTECH

Technologies: Automation Anywhere 360 – OCR, Document Understanding/ Automation, SQL

Applications Used: SAP Ariba, Excel application

Process: The process deals with **approving the invoices in the SAP Ariba for all the data which is verified in the Ariba DB**. For the unmatched invoices, need to search the invoice and assign the invoice to the Indexer or the Invoices Help desk queue. The approval is made only when the specified field of invoice attachment matches with the required fields of the Ariba DB data (for both the India and GEO locations).

Company Name: HCL TECH - Senior Analyst (RPA)- (November 2021 to Present)

PROJECT PROFILE: HCL FINANCE & BFSI

Period: November 2021 to May 2023

Client: HCLTECH

Technologies: UiPath – RE-Framework (Robotic Enterprise Framework), Excel automation, Email automation, Web (UI Automation), Orchestrator, LINQ Queries

Applications Used: Internal Finance application, Microsoft excel, word, shared drive

Process 1: The process deals with getting the input files from the specified application and the template files from the shared drive, filter the specified column values for the individual excel sheets and prepare the Retail and Corporate excel reports. **Required letters and reports are generated with the available templates** and convert them to PDF files, provide password and place the reports and letters with the business team through email.

Process 2: The process deals with the development of automation functionality of **the investor installment payment details**. The investor payment details through all the payment mode are clubbed for all the payments done on weekly basis. The investor payment details are clubbed and made **as one consolidated entry**. The final data is shared with the business team.

Process 3: The process deals with the development of Statement Generation. The **custom statement is generated for each vertical reference number (VRN)** linked with the specified dealer and the statement is downloaded for the complete the requested date range and the output files are stored with the VRN on the shared drive and the success email is triggered on completion of this process.

Process 4: The process deals with the development of **Remarks Summary reports**. The unique reference number and other necessary fields of the working file is taken and the status of those reference identifiers are inputted into the web portal and the status is captured and placed as the remarks for every entry of the working file.

Process 5: Communication Mailer for the Off-Boarding Employees: Automated the communication follow up mailer for the leaving employees with required attachments such as Employee Self Service Separation procedure, PF process transfer out procedures and Final Settlement application procedures.

Process 6: Employee SAP ID Generator: Automated the SAP Id Generation for the on-boarding employees with the personal details, employment details, department details, BGV status, joining date, location through the **Joining Console Internal portal with Employee SAP upload**, the final Status, SAP Id and remarks are updated and sent via email to the business team.

Proof of Concept: Bill Presentment**Tools: UiPath- Excel automation, Email automation**

Collated the SAP data (PO Number, Due date, Amount, Customer ID) and SAP-Ariba data (Order Id, Quantity, per unit price, tax amount, customer address) for the purchased product.

Made Validation for every purchased product with the SAP and Ariba data.

Sent the Invoice document with the delivery details in the mentioned mail id address.

Client: Caterpillar

Period: May 2023 to December 2024

PROCESS PROFILE: Finance - Invoice Processing

Technologies: Automation Anywhere 360

Applications Used: Boicing Application (portal to manage and track invoice of suppliers), SAP Application, Excel Application, Shared Drive.

Process: The process involves reading invoices from Boicing and comparing the quantities that were entered into SAP. If these match the invoice will be posted in SAP. If these do not match then if it has been less than 7 calendar days from the current date, the invoice will be skipped and checked again on the next run. If it has been greater than 7 calendar days from the current date and there is still no match the invoice will be parked in SAP and Boicing for manual intervention.

PROCESS PROFILE: Inventory Warehouse Management

Technologies: Automation Anywhere 360

Applications Used: SAP Application, Excel Application, Shared Drive.

Process: The Process goes into SAP application, input T Code in the execution area, select specified user group, and select required pass parameter(query), runs the report for all the given plants (runs the report for each plant specified) and display the files that are needed for materials master, exports data per plant, configure layout, export to table then to excel and save in a shared file.

PROCESS PROFILE: Analytics

Technologies: Automation Anywhere 360

Applications Used: Multiple internal analytics (supplier constraint management) and digital supply web applications, PowerPoint application, Excel application, shared drive.

Process: The process traverse into multiple web portals, the required capture parameters are passed and the captured data is inserted in the power point file for each supplier code and the output file is stored in shared drive. The capture parameters include (supplier code, order date range, ship value, past due). The captured data includes (order status of suppliers by month, by ship value, by week, past due trends, and several supplier metrics).

WORK EXPERIENCE 2: TEMENOS

Period: October 2020 to April 2021

- Investigated and replicated the bugs reported in the application.
 - Provided fix for the assigned bugs.
 - Written unit test cases for the changes made in the modules.
 - Worked on defects related to payment schedule module-fixed and floating interest rate calculation, Enquiry module.
-
-
