EXPERIENCE SUMMARY

- Results-driven DevOps and results-oriented Cloud Engineer with over 3 years of experience delivering scalable, secure cloud solutions on Splunk, AWS.
- Adept at automating infrastructure, optimizing resource usage, enhancing security.
- Demonstrated expertise in CI/CD pipelines, Infrastructure as Code (IaC), and advanced monitoring solutions.
- Proficient in Shell script.
- Passionate about driving innovation and efficiency in fast-paced environments through cloud technologies and DevOps practices.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS, Splunk Cloud
- **DevOps Tools:** Jenkins, Docker, Kubernetes, Ansible, Terraform, Git
- **Monitoring & Logging:** Splunk
- **Scripting Languages:** Python, Shell Scripting
- **Configuration Management:** Ansible
- **CI/CD:** Jenkins, GitHub
- **Version Control:** Git
- **Troubleshooting & Debugging:** Root cause analysis, performance optimization
- **Automation Tools:** Terraform

WORK EXPERIENCE

Currently working as a DevOps Engineer in IOPEX Technologies Pvt Ltd, Bengaluru, Karnataka (Aug 2021- Present)

PROJECT DETAILS

Web Based Learning Application (Aug 2023- till date)

DevOps Engineer

Responsibilities:

- Configured Jenkins Jobs, install plugins for generating Project artifacts.
- Installing and updating the Jenkins plugins to achieve the CI/CD.
- Tracking and keeping all the automation scripts with the source code management tool Git.
- Creating branches and tags using GitHub.
- Setup the code repository using Git and Verifying the logs if build fails.
- Maintain GIT Repositories, Handling Releases and Branching activities for GitHub.

- Automate the build Process Using Jenkins jobs. Monitoring daily builds using continuous integration tool Jenkins.
- Writing Shell Scripts to automate the build process.
- Managing S3 service and setting up EC2 instances and prerequisites on the instances for deploying the applications using AWS.
- Working on non-Production Server on AWS using EC2, VPC, IAM, S3, and Route 53.

Identifying Stale Resources (Oct 2022)

DevOps Engineer

- Created a Lambda function that identifies EBS snapshots that are no longer associated with any active EC2 instance and deletes them to save on storage costs.
- Managing snapshots of Amazon EBS volumes or images of EBS backed EC2 instances manage backup sets with retention handling, or create snapshots and images (AMIs).

AWS lambda function Development support (July 2022)

Dev Support engineer

- Developed AWS lambda function to move config file to the target location (S3 bucket) periodically.

Splunk Cloud Experience (Aug 2021 – June 2022)

- **Data Monitoring & Alerts:** Managed Splunk Cloud instances, setting up data inputs, alerts, and dashboards to monitor application and system health.
- **Splunk Observability Cloud:** Handled setting up dashboards and alerts within Splunk based on Kubernetes metrics and logs to proactively detect issues, performance bottlenecks and security threats.
- **Performance Tuning:** Optimized Splunk searches and indexing strategies to improve performance and reduce resource usage.
- **User Management:** Handled role-based access controls, ensuring secure and efficient user management within Splunk Cloud environments.

EDUCATION

Bachelor of Engineering – CSE, 2020
Bangalore institute of Technology

Certifications

- AWS Solutions Architect and DevOps certified with internship from Micro Degree
- Splunk core user certified
- Splunk core power user certified
