

## Objective

---

Aspiring Software Engineer seeking to leverage my software development skills and experience in a dynamic role that fosters innovation and improves system performance.

## Experience

---

**Software Engineer**, Akriti Computing – Bengaluru, India May 2023 - Present

- Developed an Electron application to track device and application usage across Mac and Windows devices.
- Implemented silent authentication mechanisms to enhance security and improve user experience, reducing login friction and increasing engagement.
- Designed and developed RESTful APIs for backend processes, ensuring efficient data retrieval and manipulation, improving application performance by 30
- Created browser extensions for Chrome, Edge, and Firefox to monitor active tabs and time spent, utilizing a unified codebase for streamlined maintenance and reduced deployment time by 25
- Collaborated closely with UI/UX designers to ensure seamless integration of frontend and backend features, enhancing overall user interface and experience.

**Associate Software Engineer**, Revaalo Labs – Bengaluru, India Dec 2021 - Apr 2023

- Developed low-latency, high-availability applications with a focus on data protection and security compliance.
- Ensured compliance with data protection regulations by implementing security best practices, including encryption and secure data storage solutions.
- Collaborated with cross-functional teams to gather requirements, define project scope, and ensure alignment on deliverables, leading to successful project launches.
- Conducted regular code reviews and provided mentorship to junior developers, fostering a collaborative environment.
- Documented software designs, APIs, and project workflows, creating a comprehensive knowledge base for the team.

### Key Projects:

- **Lead Generation Tool:** Developed a no-code platform for converting web traffic into leads, integrating real-time analytics features that increased lead capture by 40
- **Online Doctor Consultation:** Built a comprehensive application enabling patients to book appointments and consult with doctors via video calls, implementing secure messaging and prescription management features.
- **Application discovery:** Built desktop application and browser extension for Application Discovery, enabling seamless identification and management of all software used within the organization. This solution enhanced visibility, security, and compliance across the application landscape.

## Skills

---

**Languages:** Node.js, JavaScript, TypeScript

**Frameworks:** Express.js, React, Redux

**Databases:** MongoDB, SQL

**Cloud Services:** AWS (SES, Lightsail, API Gateway, Kinesis)

**Web Technologies:** HTML, Web Extensions

## Education

---

**B.E. in Computer Science and Engineering** Vemana Institute of Technology

Aug 2015 - Jul 2020
