in [Dhilippan](#)

Python Developer with over 3 years of experience designing, building and deploying robust backend systems and APIs. Proficient in frameworks like Django and Flask, with expertise in creating scalable, maintainable and optimized applications. Passionate about crafting clean, testable and extensible code while driving collaborative team environments. Excels in troubleshooting, debugging and problem-solving to deliver reliable and efficient solutions.

Experience

AGAM TECHNOLOGIES, COIMBATORE

Python Developer

November 2023 – November 2024

- Designed and implemented backend infrastructure and RESTful APIs for a fintech application using Flask.
- Delivered robust and scalable solutions for the payment gateways, OAuth 2.0, digital signatures and KYC verification via third-party API integrations.
- Encouraged and supported knowledge sharing within the team, fostering a culture of collaboration and growth.

Projects:

- **Finvesta & Network Manager:** A B2B platform for onboarding, offboarding and wallet-based services, automating bank statements requests to streamline financial workflow.

INFOGNANA SOLUTIONS, COIMBATORE

Python Developer

November 2022 – November 2023

- Build backend systems for application using Flask and integrated APIs based on the customer requirements.
- Debugged and resolved critical issues in applications, ensuring smooth performance.

Projects:

- **Compfie:** A compliance tracking tool for the regulatory monitoring. Integrated with external data repositories.
- **Infidigit:** A search engine optimization tool; implemented web scraping using BeautifulSoup and requests libraries.
- **DMS:** A task and performance management system. Backend: Django, Database: PostgreSQL, Frontend: HTML, JavaScript.

KICE INFOSYSTEMS, TIRUPUR

Python Developer

August 2022 – November 2023

- Designed and implemented scalable backend systems using Django, ensuring robust and maintainable code.
- Developed clean, testable code while contributing to an agile development process.
- Actively participated in team discussions to brainstorm and implemented innovative ideas.

Projects:

- **Tereta:** A full-stack web app for business process simulation and management. Utilized Chart.js for the visualizing outcomes and RPA for automating workflows, improving efficiency and reducing errors.

Technical Skills

- Programming Languages: Python, JavaScript, HTML, CSS
- Frameworks & Libraries: Django, Flask
- Database Systems: PostgreSQL, MongoDB
- Tools & Platforms: PyCharm, Visual Studio, Docker, GitLab
- Operating Systems: Windows, Linux

Education

Bachelor's Degree in Electrical and Electronics Engineering (2014 – 2018)
