ABOUT ME

Proficient software developer with 3 years of experience in developing and maintaining high-performance systems using Spring Boot and Hibernate. Experienced in developing web applications with emphasis on clean code, maintainability, security and performance. Strong collaborator with a track record of delivering on-time and on-budget projects and initiatives.

EXPERIENCE

A2Technologies Pvt Ltd, Pudukkottai.

Junior Software Engineer.

16th April 2021 – 19th April 2024

TVS MOBILITY Pvt Ltd, Poonamallee.

22nd April 2024 – 1st July 2024

EDUCATION

K.S.R College of Arts and Science, Tiruchengode.

B.Sc., Computer Science (68%)

July 2018 - April 2021

Shri Vidhya Bharati Matric Hr. Sec School,

Sakkarampalayam.

HSC (66.5%)

June 2017 - April 2018

Shri Vinayaga Matric Hr. Sec School,

Vaiyappamalai.

SSLC (82%)

June 2015- April 2016

SKILLS

- ❖ Core Java / J2EE
- ❖ Spring Boot
- ❖ Hibernate
- ❖ Microservices
- ❖ SQL
- ❖ AzureDevOps - Pipeline
- ❖ Git

PROFESSIONAL SUMMARY:

- ❖ As the Java Software Developer, I Developed the Price Master module for the Generate Survey feature within Car Repair Billing.
- ❖ Contributed to the creation of Billing Repair Card (BRC), a vital component of Car Repair Billing serving repair shops, short lines, and regional railroads.
- ❖ Strong analytical, debugging skills with ability to learn and use new tools and techniques.
- ❖ Investigated and resolved bugs, optimizing application performance and ensuring smooth user experience. Adaptive to learn new technologies.
- ❖ Actively participated in daily stand-up meetings and sprint planning sessions, adhering to Agile/Scrum methodologies.

PROJECTS:

Project: CRB: Car Repair Billing - Creating the Car Master for Generating Survey
[A2Technologies Pvt Ltd].

Client: RailInc

CRB - Car Repair Billing - Price Master Generation.

Project Description:

Billing Repair Card (BRC) is a component of Car Repair Billing that enables repair shops and short line and regional railroads. To use an interface to report repairs, automatically price repairs against the Car Repair Billing Price Master, and send the repair data directly into Railinc's Car Repair Billing Data Exchange, BRC supports more efficient business exchanges among railcar owners, freight car repair companies, and railroads. Repair shops, short lines, and regional railroads can accurately price their repairs and create invoices with BRC, Car owners benefit from the Car Repair Billing Price Master, more accurate price matrices, and data exchanges that help eliminate paper invoice.

Project: EDMP FileIt Migration

Project Description:

EDMP FileIt Migration – Construct the file and send the files via FileIt to EDMP path.

EDMP is a centralised data lake which all the applications should transfer. Modified and deleted data. GPBS is sending all these types via CDC mode in DaaS. We have created a new component which is to construct the file and send the files via FileIt to EDMP NAS path.

Key Contributions:

- Leveraged Java 17 and Spring Boot 3.X frameworks to develop tailored functionalities in accordance with project requirements.
- Devised innovative strategies to handle extensive volumes of customer data, amounting to millions of records, ensuring efficient processing and seamless transfer operations.
- Employed a splittable approach to manage data segmentation electively, optimising performance of the migration process.
- Orchestrated data transfer operations through Solace MQ listener, ensuring seamless communication and synchronisation between source and destination environments.

TECHNOLOGIES USED:

- **Language** : Java
- **Frameworks** : Spring Boot Restful API and Spring Data JPA
- **Database** : Oracle SQL Developer.
- **Build Tool** : Maven.
- **Architecture** : Microservices
- **CI/CD** : Jenkins, Azure-Pipeline, Solace MQ
- **Version Control** : Azure DevOps, Bitbucket
- **IDE** : STS, IntelliJ.

Declaration

I hereby declare that the above information is true to the best of my knowledge.
