

DINESH BABU RAJENTHIRAN

Bengaluru | +91-9994554077 | dineshbabu_r@yahoo.com

PROFESSIONAL SUMMARY

Experienced Database Consultant with 12 years of experience in MSSQL Database Design, Implementation, administrator, Optimizing database performance, security, Cloud Project Transition and Client Engagement. Having strong Software Development Life Cycle experience in working with and leading cross-functional technical teams to execute and deliver high-visibility Database technology initiatives. Proficient in building relationships with key stakeholders to Resolve roadblocks and successfully deliver the projects.

ACHIEVEMENTS

Database Optimization

Improved SQL query efficiency by 70% by identifying and rectifying suboptimal indexing strategies, which enhanced system performance and user experience. Resolved a critical performance bottleneck.

Data Migration Lead

Managed and optimized SQL Server databases in an Azure\AWS environment, ensuring high availability and scalability

Received Special Initiative Award for outstanding contribution to critical client DB migration

Recipient of Feather in Cap Award for successful AWS cloud migration

WORK HISTORY

Associate Consultant - Microsoft Azure SQL Server DBA

06/2021 - Current

Tata Consultancy Services - Bangalore, India

- Proficient in installing, configuring, and maintaining SQL Server databases. Understanding of data modeling, normalization, and database design principles
- Resolved a critical performance bottleneck, resulting in a 50% improvement in system performance. Provided technical support for SQL Server databases, improving operational efficiency.
- Enforced security and integrity controls to prevent breaches, loss and damage. Collaborated closely with IT project managers to deliver projects timely and efficiently
- Implement and manage database backup strategies, high availability solutions (e.g., clustering, mirroring, Always On), and disaster recovery plans. Monitored alert log, memory, disk I/O and CPU usage as part of DBA daily activities.
- Familiar with Extract, Transform, Load (ETL) processes for data integration and migration projects, ensuring data accessibility and consistency. Organized planning, connection and deployment for data warehouse systems (OLAP & OLTP).
- Proficient in identifying, logging, categorizing, and prioritizing incidents to quickly resolve issues and minimize impact on operations. Strong analytical skills in root cause analysis to identify underlying problems and implement effective solutions, ensuring long-term resolution.
- Experience working within multidisciplinary teams to ensure integrated approaches to incident resolution and problem management.
- Knowledgeable in best practices for data governance, including data quality management, data stewardship, and compliance with regulatory standards.
- Proven ability to lead and motivate diverse teams towards achieving common goals while fostering a collaborative environment
- Also, responsible for creating and managing Azure SQL Databases (PaaS) and Elastic Pools.

- Familiar with deployed Integration Services (SSIS) packages and Report Definition Language (RDL) reports
- Configured databases backup in Azure Recovery Service Vault
- Created and managed login credentials in Azure Key Vault
- Encrypted databases by using Azure EKM and TDE on Azure IaaS

Infra Technology Specialist – SQL Server/Azure SQL DBA

09/2016 – 05/2021

Cognizant Technologies - Bangalore, India

- Optimized existing database systems, achieving a 20 % Improvement in efficiency and resource utilization.
- Database administration activities for DB Security (creating logins, users, roles, and assigning permission to them). database files management, backup/restore, security management and Database maintenance activities (Re-Indexing and Rebuild Indexing)
- Conducted periodic security audits that led to the identification and patching of 90% of potential database vulnerabilities within a year. Trained and mentored a team of junior DBAs, leading to a 20% increase in department efficiency and a reduction in critical incidents.
- Providing on-call support to project for various environment.
- Proficient in Azure SaaS, PaaS, and IaaS solutions, with a strong understanding of cloud architecture and deployment models. Hands-on experience with Azure Site Recovery for disaster recovery planning, ensuring business continuity and data protection.
- Performed Business Continuity Plan (BCP), Log Shipping, Database Mirroring and synchronization with exposure on other high availability likes Clustering, Replication and Always On.
- Strong capabilities in managing and optimizing data storage solutions using Azure Blob Storage, ensuring secure and scalable data access. Familiar with Microsoft Fabric for building data-centric applications, facilitating efficient data analysis and visualization.
- Proficient in ITIL Service lifecycle, Including service strategy, service design, service transition, Operation.

Senior Administrator – SQL Server DBA

08/2014 – 09/2016

Wipro Technologies - Bangalore, India

- Extensive experience in migrating over 300 MSSQL databases Instance (versions 2005, 2008, 2012) to MSSQL 2016 on AWS EC2 instances, ensuring data integrity and minimal downtime.
- Proficient in leveraging Amazon Web Services (AWS) for database deployment, management, and optimization, with a focus on EC2 instances and services
- Proficient in using scripting languages (like PowerShell, Python) for automating database migration tasks and ensuring consistent deployment processes
- Proficient in implementing and monitoring database security protocols to safeguard sensitive information and ensure compliance with industry standards
- Worked along with CISO and Corporate Security group to ensure the Organization security policies are implemented across the business unit
- Skilled in planning, executing, and overseeing the release of database updates and migrations, ensuring alignment with business objectives and minimizing downtime
- Expertise in creating and managing Standard Operating Procedures (SOPs), Knowledge Base articles, and Known Error Database (KEDB) documentation to ensure clarity and consistency in business-as-usual (BAU) activities

SQL Server DBA

10/2012 – 08/2014

Chella Software Pvt Ltd - Mumbai, India

- Experienced in T-SQL scripting and automation of database tasks, including job scheduling and maintenance plans.
- Proficient in using SQL Server monitoring tools and performance dashboards to identify and resolve issues promptly.

- Ability to create comprehensive documentation for database configurations, processes, and best practices, along with generating reports for stakeholders
- Resolved complex server issues through deep root cause analysis. Adhered to company's IT policies whilst managing the servers' infrastructure. Managed user access rights, securing sensitive data from unauthorized personnel.
- Monitored Database health with advanced diagnostic tools and techniques. Designed and implemented scalable, efficient IT infrastructure in collaboration with cross-functional teams.

Junior Assistant

08/2007 – 09/2012

Repc Bank Ltd - Chennai, India

- Carried out day-to-day duties accurately and efficiently.
- Quickly learned and applied new skills to daily tasks, improving efficiency and productivity.

SKILLS

- | | |
|--|---|
| • SQL server Database Technology | • Visual Studio |
| • Cloud DB migration Strategies & Cloud security | • PowerShell tooling, Redgate, |
| • Cloud Technology (Azure & AWS) | • Reporting and documentation |
| • Infrastructure services & PaaS | • Windows server and virtualization |
| • SQL Server Reporting Services, Power BI, TSQL, SSIS, | • SolarWinds DPA, Dyna Trace, Service Now, Remedy, HP SM7 |

CERTIFICATIONS AND LICENSES

- Microsoft Certified Azure Data Fundamentals
- Microsoft Certified Azure Database Administrator Associate
- Microsoft Certified Azure Data Engineer Associate
- Microsoft Certified Azure Administrator Associate

EDUCATION

Bachelor of Technology: Information Technology

Adhiyamaan College of Engineering (Anna University) - Chennai, India
