CERTIFICATION

1. Masters Program - DevOps Engineer : Simplilearn Certified - 2023

- DevOps Training
- CI/CD Pipeline with Jenkins
- Docker Certified Associate (DCA) Certification Training Course
- Certified Kubernetes Administrator
- Linux Training

Other Certifications :

- AWS Certified Solutions Architect - Associate 2023 by Udemy
- Dive in to Ansible -Devops by Udemy
- Git and Github Training by simplilearn
- Hashicorp Certified – Terraform Associate 2023 Udemy

EDUCATION

July 2021
M.Tech | Computer Science
Dayananda Sagar University,
Bangalore | CGPA : 8.16

June 2019
B.E | Computer Science
Dr. Sri Shivakumara Mahaswamij
College, Bangalore | CGPA : 7

PCMC
Scared Heart Girls Pu College,
Percentage : 66.16 %

CAREER OBJECTIVE

I have obtained valuable experience in comprehending diverse aspects of DevOps during my Masters Program, which has significantly boosted my personal confidence. Therefore, I am actively seeking a challenging role in **Docker Certified Administrator, AWS, Kubernetes, Terraform, or related fields**. My aim is to leverage my skills, contribute effectively, and enhance my capabilities as I advance in my career.

EXPERIENCE

[October 2022 - December 2022]

Senior Software Engineer : Veoneer India Pvt.Ltd

- 2 years of experience in software testing, with a focus on quality and automation.
- Responsible for reporting and tracking software faults.

[October 2021 - October 2022]

Master Engineering Trainee : Veoneer India Pvt.Ltd.

- Achieved an 82% improvement in testing efficiency by automating manual test cases using CAPL.
- Worked on various modules, including PartNumber validation, DTC (Diagnostic Trouble Code) handling, Proxy check, and Panel creation.

PROJECTS

Role – Handled Automation of web page from scratch

- **The Tool Management Web Page** is built on SharePoint lists, and it seamlessly integrates with SharePoint Online using three key technologies: Microsoft Forms, PowerApps, and Power Automate. These technologies enable you to automate your workflows efficiently.
- Automation of the complete workflow of the web page is achieved through the utilization of Microsoft Forms, PowerApps, and Power Automate.
- **The RCS HUB project** focuses on automating the Team HUB. The frontend web page is developed on SharePoint, while the backend operations are powered by Power Automate. The resulting data is displayed using Power BI.

Fiat Chrysler Automobiles (FCA) project

- Experience with various software variants: WD_wK and MX (291, 598), including software realization.
- Proficient in testing modules such as PartNumber testing, DTC (fault checking of the software), and Regression Testing.
- Skilled in utilizing TMA feature for automated manual test cases using Capl, and designing a panel for this feature.
- Developed comprehensive test plans and test cases for diverse processes and product specifications

.Devops Projects

- Automated infrastructure using Terraform: Created AWS resources and installed Jenkins, Python, and Java.
- Created a Docker image and deployed it to Kubernetes.

INTERNSHIP

Veoneer India Pvt.Ltd. [Nov 2020 – Sep 2021]

- “TOOL MANAGEMENT WEB PAGE”
- (Using SharePoint with power Automate flow)
- Manual testing DTC.

- Implemented branching development model using Git for the project.
- Dockerized Jenkins and Maven: Created a Jenkins container and deployed Maven using DSL (plugin and script).
- Configured Jenkins with AWS: Created Jenkins, remote host, and SQL containers. Took a backup of the SQL database on the remote host. The remote host was connected to Jenkins through SSH. Deployed the backup to an AWS S3 bucket using Jenkins.
- Jenkins pipeline As A Code(Groovy) project
- Continuous Integration using Jenkins, Nexus, SonarQube and Slack

TECHNICAL SKILLS

- Git/Github
- Linux commands
- Python scripting
- Docker
- Kubernetes
- Terraform
- Ansible
- Jenkins
- AWS
- SharePoint
