Professional Summary

Clinically trained professional with 14+ years of experience spanning emergency medicine, chronic disease management, and digital health innovation. Proven ability to bridge clinical depth with product strategy—leading to measurable improvements in AI-driven diagnostics, user engagement, and scalable wellness programs.

At Apollo 24|7, spearheaded the fine-tuning and clinical validation of AskApollo—an LLM-powered health chatbot—ensuring accuracy, empathy, and safety. Co-created intelligent modules across triage, lab recommendations, and personalized care content.

Currently authoring a book titled Generative AI in Health Care, exploring the convergence of clinical practice, AI ethics, workflow automation, and chronic care innovation.

As Dr. Sujoy Kar (Chief Medical Information Officer, Apollo) puts it:

"Saravanan blends clinical insight with strategic product thinking. At Apollo 24|7, he drove a 15% improvement in diagnostic accuracy, curated personalized content, and expanded our knowledge base with 3000+ case sheets. His patient-first mindset, ownership, and iterative execution made him invaluable. I highly recommend him for roles in clinical product management or digital health."

Also passionate about research, wellness education, and building scalable healthtech solutions that put patients at the center.

Core Skills

- Clinical Product Strategy
- AI/ML-informed Clinical Decision Tools
- Digital Health UX & Patient Journeys
- Chronic Disease Management Programs

- Clinical Workflow Design & Triage Logic
- Generative AI Validation in Healthcare
- Data-informed Product Development
- EMR Integration & Public Health Tools
- Cross-functional Team Collaboration
- Agile & Iterative Product Environments

Experience

Apollo 24|7 – Clinical Product Manager

Sep 2022 – Present

- Led the clinical validation and fine-tuning of AskApollo, a Generative AI chatbot—ensuring safe, context-aware, and medically sound outputs.
- Improved diagnostic recommendation accuracy by 15% through iterative logic tuning and evidence-based refinement.
- Authored and curated 3000+ clinical case sheets, enabling accurate triage, specialty routing, and personalized care delivery.
- Designed personalized self-care tips embedded in virtual consultation and symptom checker flows, grounded in behavioral science and medical appropriateness.
- Delivered clinical logic layers for supplements, prescriptions, lab tests, and triaging across multiple modules.
- Collaborated closely with data scientists, developers, and medical experts to ensure end-to-end safety and utility of AI in healthcare workflows.

MFine – Health and Wellness Coach / Health Assessment Doctor

July 2019 – Aug 2022

- Triage and routed thousands of patients to appropriate specialties during virtual consultations.
- Supported over 1000 patients in managing chronic conditions like diabetes, thyroid issues, and obesity.
- Interpreted full-body check-up results for users and guided them on clinical follow-ups.
- Co-led a clinical study with 203 subjects highlighting variability in self-monitoring devices (BP, SpO₂, HR).
- Conducted wellness sessions (yoga, meditation) and helped build MFine's chronic care pathways.
- Acted as the clinical bridge between doctors and developers—translating real-world needs into digital product enhancements.

JK Technosoft – Medical Consultant, eHealth Kerala

Sep 2017 – Jul 2019

- Gathered feedback from government hospitals to improve the state's public EHR systems.
- Promoted clinical adoption of digital documentation among rural and urban healthcare centers.
- Evaluated and improved mobile applications used by ASHA workers, enhancing community-level health delivery.

CISF, Apollo, Aristo – Emergency & Primary Care Physician

2011 – 2017

- Delivered emergency and outpatient care across high-volume facilities.
- Managed triage and 10-bed emergency units as a General Duty Medical Officer (GDMO) in CISF.
- Handled acute care scenarios, trauma, and chronic conditions in real-time frontline settings.

Education & Training

- MBBS, Government Rajaji Hospital (GRH), Madurai
- Fellowship in Diabetes, Medvarsity – 2024
- Ongoing learning in product management, UX, and digital health systems

Thought Leadership & Projects

Author – Diabetes Reversal in Tamil (educational book on lifestyle-driven care)

Book in Progress – Generative AI in Health Care (2025)

YouTube Channel – 600+ subscribers | Tamil health videos on wellness & chronic care

Clinical Study Co-Lead – Self-monitoring device variability across 203 participants

Quote – "The good physician treats the disease; the great physician treats the patient who has the disease."— Sir William Osler (Father of Modern Medicine)
