Profile

- About 1 years of experience as a Cloud and DevOps Intern at Whizlabs.
- Ability to collaborate with team and communicate adequately.
- Result-oriented and problem-solving ability with strong critical thinking and organizational skills, as evidenced by increasing levels of responsibility at work.

Technical Skills

- Programming Languages: HTML, CSS, JS, Python.
- Databases: MySQL, MongoDB.
- Cloud Platforms: AWS, GCP, Azure
- Container Platforms & Orchestration: Docker, Kubernetes.
- Automation: Ansible, Terraform.
- CI/CD Tools: Jenkins.
- Tools/Methodologies: GIT, GitLab, Jira, Scrum, Agile, Slack, Discord.
- Other skills: Linux, Shell Scripting

Education

Bachelor of Technology in Information Technology

Nov 2020 - May 2024

Charotar University of Science and Technology • Gujarat, India

- Relevant coursework: Operating System, RDBMS, Networking, Software Engineering, Cloud Computing, DevOps.
- GPA: 8.8 / 10.0.

Certifications

- **Amazon Web Services** – AWS Certified Solutions Architect – Associate (Nov 2024), AWS Cloud Quest – Cloud Practitioner, (Jun 2023)
- **Microsoft Azure Platform** – Microsoft Azure Fundamentals (AZ-900, Jun 2023)
- **Google Cloud Platforms** – Google Cloud Career Practitioner (GCCP, Dec 2022)

Work Experience

Cloud Computing Intern (AWS and GCP)

Dec 2023 - Nov 2024

Whizlabs • Coimbatore, Tamil Nadu

- Designed and deployed over 15+ resilient cloud architectures using AWS and GCP, tailored to meet complex client needs across various industries.
- Authored and developed 70+ hands-on labs and problem-driven solutions, significantly enhancing client engagement and sales impact.
- Automated workflows by creating shell scripts for resource deletion and validation, ensuring operational efficiency and accuracy.
- Engineered robust Python-based solutions for lab activities, streamlining processes and contributing directly to business growth.
- Diagnosed and resolved critical production issues, maintaining system reliability and minimizing downtime for clients.

Cloud/DevOps Intern

May 2023 - Aug 2023

Websmith Solutions • Rajkot, Gujarat

- Implemented and managed containerized solutions using Docker, ensuring seamless application deployment and scalability.
- Automated infrastructure provisioning and configuration using Ansible and Terraform, reducing manual effort and deployment errors.
- Contributed to the design and implementation of efficient CI/CD pipelines, streamlining deployment processes and ensuring seamless integration.

Web Development Intern

May 2022 - Jun 2022

Websmith Solutions • Rajkot, Gujarat

- Collaborated with cross-functional teams to develop web applications using a wide range of technologies. Gained a strong foundation in full-stack development, including front-end and back-end technologies.
- Developed a fully responsive website as a part of the final internship project with HTML, CSS and JS for the frontend and MongoDB for the backend.

Academic Projects

Advanced CI/CD Pipeline with AWS

Apr 2023 - Aug 2023

Charotar University of Science and Technology • Gujarat, India

- This project implements a robust CI/CD pipeline leveraging AWS services to automate application delivery across multiple environments (Dev, Staging, Prod). Source code is managed in AWS CodeCommit, built and tested with CodeBuild, and deployed using CodeDeploy. The pipeline, orchestrated by CodePipeline, integrates approval steps, real-time notifications via SNS.

Around The World – A fully responsive website

Aug 2022 - Nov 2022

Charotar University of Science and Technology • Gujarat, India

- This project involves designing and developing a fully responsive website using HTML for structure, CSS for styling, JavaScript for interactivity, and MongoDB for database storage. The website is accessible across various devices and screen sizes, providing a seamless user experience. MongoDB is employed as the backend database to store and retrieve dynamic content.

Community Leadership

- As a Public Relations head at GDSC, led a team of 10 individuals in strategically planning and executing tech events centered on emerging Google technologies.
- Attained an exceptional record by directing and executing more than 5 tech events, attracting a cumulative attendance of 700+ participants.
- Demonstrated exceptional leadership skills by organizing and managing Spoural, a prestigious university-level event encompassing a wide range of activities.
- Took charge of managing event's finances, exhibiting strong financial acumen by creating and adhering to a budget, sourcing sponsorship, and efficiently allocating resources to different aspects of event.
- Received positive feedback from event attendees, participants, and faculty members, highlighting effective leadership qualities such as decision-making and ability to motivate and inspire a diverse group of individuals.
