

ELDHOSE P BABU

MERN STACK DEVELOPER

eldhosebabu316@gmail.com | [LinkedIn/ EldhoseBabu](#) | +91 9496717572 | Kochi, India

Professional Summary

I hold a Bachelor of Technology degree in Computer Science and Engineering and possess one year of professional experience in HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB. I am certified in the MERN stack by NACTET and have acquired practical experience through an internship in the Research and Development department at Luminar Technohub, in addition to enhancing my skills as a freelance developer. Presently, I am employed as a React.js Developer at KeyPoint Technologies, where I focus on creating dynamic and resilient web applications.

Professional Experience

Key Point Technologies

OCT 2024 - PRESENT

REACT JS DEVELOPER

- Partnered with a progressive team to develop and provide cutting-edge web solutions for Fertilizers & Chemicals Travancore Limited (FACT), aligning with industry benchmarks and satisfying client needs.
- Improved expertise in React.js by developing strong, scalable, and high-performance web applications that cater to a wide range of business needs.
- Implemented a client-centered framework, delivering meaningful solutions that consistently aligned with high-quality expectations and project timelines.
- Orchestrated the rollout of innovative features and optimized application performance to boost user experience and satisfaction levels.

Luminar Technohub R&D, Kochi

JUL 2023 - MAR 2024

MERN STACK DEVELOPER INTERN

- **Integration and Collaboration:** Encouraged team cooperation through the application of MERN stack technologies, which facilitated streamlined workflows and ensured timely project completion.
- **Business Requirements Analysis:** Worked alongside diverse teams to grasp business requirements and offer analytical support for multiple projects and initiatives.

SKILLS

Programming Languages :

- **JavaScript:** Adept in JavaScript, possessing expertise in both front-end and back-end development, and committed to delivering clean, efficient, and maintainable code.

Front End Technologies :

- **React.js:** Competent in building dynamic and responsive web applications with React.js, incorporating hooks, managing state effectively, and adhering to a component-based design framework.

Back End Technologies :

- **Node.js:** Skilled in server-side programming with Node.js, creating scalable and high-performance applications.
- **Express.js:** Proficient in using Express.js for building robust and RESTful APIs. Experienced in middleware integration and routing.

Web Technologies :

- **Html5:** Strong understanding of HTML5, ensuring semantic and accessible markup for web applications.
- **Css3:** Expertise in CSS3 for styling and layout, including modern techniques like Flexbox and Grid.
- **Tailwind Css:** Experienced in using Tailwind CSS to rapidly design custom user interfaces.
- **Bootstrap:** Proficient in leveraging Bootstrap for responsive and mobile-first web development.

Database:

- **MongoDB:** Skilled in using MongoDB for database management, including CRUD operations, schema design, and performance optimization.

Tools:

- **Git/Github:** Proficient in version control using Git and GitHub, including branching, merging, and pull request workflows.

Testing and Debugging:

- **Chrome Dev Tools:** Proficient in using Chrome Dev Tools for debugging, performance profiling, and front-end development.
- **Postman:** Skilled in using Postman for API testing, ensuring robust and reliable endpoints.
- **Thunder Client:** Experienced in using Thunder Client for quick and efficient API testing within Visual Studio Code.

Authentication:

- **JSON Web Token:** Proficient in implementing authentication and authorization using JWT, ensuring secure access to web applications.

PROJECTS

Employee Performance Tracker

Developed an employee performance management website using React, Django, and MongoDB. Streamlined tracking, task assignment, and feedback for HR, team leaders, and employees. Enhanced user-friendliness and functionality.

Real Estate Application

Comprehensive real estate app with secure authentication, distinct user roles, seamless profiles, efficient property listing, and advanced search. Technologies used in this project include React.js, React Hooks, React Router, React Redux, Axios, JavaScript, Node.js, JWT Authentication, and Tailwind CSS.

Travel App

Travel-focused web app with essential functionalities, including country safety information and emergency contacts. Technologies used in this project include React.js, React Hooks, React Router, React Bootstrap, Axios, JavaScript, and Tailwind CSS.

Reservation Web Application

A reservation system has been developed with React and Tailwind CSS, which includes specialized panels for both Users and Administrators. The system is equipped with secure authentication, a payment gateway, and user-friendly interfaces that facilitate seamless booking management. Administrators can efficiently oversee reservations and track activities, ensuring a smooth experience for users.

EDUCATION

Bachelor of Technology

2018 - 2022

APJ Abdul Kalam Technological University, Kerala
Computer Science and Engineering - with CGPA of 6.7

Higher Secondary Education

2016 - 2018

State Board of Kerala
Computer Science - 75%

CERTIFICATIONS

NACTET Certification in MERN Stack Development
