PERSONAL PROJECTS

PERPARE SMART

- Prepare Smart is useful for any students, studying in the IT department . It shows them the study material so they can visit in no time. This is different from other software with same domain because it contains the actual and exact material to study or globally where user can visit and use .
- Software is Mobile/Smartphone based, so one can use it anywhere.
- Technologies used:- Java And Android.
- My role in the project was to build design of the Application.

NON TECHNICAL SKILLS
