Education

2020 – 2024	B.TECH <i>Sir C.R.Reddy college of Engineering</i> C.G.P.A : 7.43
2018 – 2020	INTERMEDIATE <i>Sri Sidhartha Junior College</i> C.G.P.A : 9.64
2018	SSC <i>Nellore Ravindra Bharathi School</i> C.G.P.A : 9.7

Professional Experience

2024/06 – present Bangalore	Embedded System Developer Trainee at EMERTXE TECHNOLOGIES
--------------------------------	--

Skills

Advanced C	● ● ● ● ●	Data structures and Algorithms
OOPS using (C++)		Python
Linux (operating systems)		Micro controllers -PIC (18F4580)
DBMS		Communication Protocols - UART, SPI, I2C, CAN

Projects

FAST DATA RETRIEVAL USING INVERTED SEARCH APPROACH :

.Developed a command-line software in C for efficient data searching across multiple files. • Utilized hash tables and linked lists to create an indexed database, achieving $O(1)$ search time. • Optimized for >80% efficiency with various data sizes. • Skills: Debugging, Problem Solving, Data Structures and Algorithms, Linux, C Programming.

IMAGE STEGANOGRAPHY USING LSB ENCODING AND DECODING TECHNIQUES :

Developed a command-line tool for LSB image steganography in C on Linux, enabling secure and reliable (>90%) data hiding and retrieval for confidential communication. Designed and implemented efficient encoding and decoding algorithms to embed secret data in image LSBs. Enhanced skills in debugging, problem-solving, and advanced C programming.

PHONEBOOK APPLICATION USING C LANGUAGE:

Developed a C Phone book project with features for Adding, Editing, Searching, and Deleting Contacts. • In the Address Book project, I gained experience in file access and management, along with a solid introduction to user-defined data types such as structures and typedef in C, enhancing my understanding of data organization and manipulation.

ARBITRARY PRECISION CALCULATOR :

The Arbitrary Precision Project focuses on implementing mathematical operations (addition, subtraction, multiplication, etc.) on numbers of unlimited size using data structures like linked lists to overcome standard datatype constraints. SKILLS : Debugging , Problem Solving , DSA , C(programming Language)

Embedded Platforms

HOST - MPLAB XIDE (Application Software)

TARGET - Rydo Lab Board - PIC (18F4580)

CROSS COMPILER - XC8

Internships

- > Hand on technical training program Embedded Systems Course at Emertxe Information Technologies (<http://www.emertxe.com> ) , Bangalore.
- > Engaged with a long-term internship programming organized by Bist technology PVT.LTD  along the Andhra Pradesh state council of Higher Education upon an embedded system

Personal Attributes

- > Quick learning and adaptability to new technologies.
- > Proficient time management skills to consistently meet deadline
