- B.Tech(CSIT) MJP Rohilkhand University | Bareilly | 2010

CERTIFICATIONS

- Project Management Professional (PMP)®I
- Scrum Fundamental Certified (Scrumstudy)

PROFILE SUMMARY

- Currently working as **Project Manager at MapmyIndia (C.E. Infosystems Ltd.)**; have successfully completed multiple projects for **Indian and Global Automotive Clients**
- **Proficient in executing projects** with competent cross-functional skills and ensuring **on-time deliverables within preset cost parameters** as well as resolving day-to-day impediments to ensure smooth project progress.
- Excellence in **mapping client's requirements, designing customized solutions**; a strong **customer-centric approach** & motivated to deliver quality results.
- **A project planner** with expertise in planning, executing and spearheading various projects as per customer's requirements.
- **Gathering project requirements**; ensuring that these are translated into user stories and acceptance criteria.
- **Working with the Product Management Team** for the roadmap for technology transformation and new features.
- Creating documents across the **product lifecycle** including **product strategy, roadmap, business requirements, use cases and functional specifications**.
- **Conducting SWOT analysis** on product positioning, risk analysis and development roadmaps.
- Possess strong understanding of **application architecture (Android, iOS, Web, Linux) and Required Interfaces**.
- Familiar with projection technologies such as **Android Auto, CarPlay, MirrorLink, WebLink, Bluetooth Communication, WiFi Direct and Web Technologies**.
- Contributed throughout the development phase by **tracking technical issues & solving problems**, especially for the issues spanning multiple programs.

WORK EXPERIENCE

MapmyIndia (CE Info System Ltd. Delhi) | Project Manager | Feb'12 – Present

Key Result Areas:

- Collaborating with the team to fulfill business requirements by developing prototypes (POC), analyzing work-flows, defining project milestones, schedules, monitoring progress, and monitor and update plans as required.
- Coordinating with the core technical team to develop and validate custom APIs; prerequisite for successful project completion.
- Setting up Jira, creating user stories & updating status according to issue progress.
- Providing input for mockups on Adobe XD, finalizing UI and guiding design team; provide wireframes as and when required
- Interfacing with QA &Development Engineers to optimize workflow, scrutinize test processes & develop strategies for testing products & services in Agile environment.
- Managing client requirements for daily activities related to automotive projects & creating on-demand reports or presentations to meet stakeholder requirements.
- Assuming product ownership for applications, responsible for development of new feature and improvements.
- Driving product store releases for Android and iOS, coordinating both public releases and internal testing releases.
- Monitoring all project tasks, ensuring completion within time-frame, resolving all issues according to required project plan, administering everyday activities and assisting to resolve all issues within organization.
- Analyzing all team work performance & ensuring achievement of all objectives within required deadlines and monitor all system functionality and integration.
- Evaluating all project plan status to identify and resolve all issues and manage integrated applications.

- Rolling out customer interaction forms periodically to understand customer experience, identifying product gaps and generating ideas that improves customer experience and drive growth.
- Creating documents across the product life cycle including product strategy, roadmap, business requirements, use cases, functional specifications, product guide

Highlights:

- Steered Product Team in the development of telematics and navigation solutions for various products that grew business opportunities.
- Works with adaptive project management techniques, resulting in an increase in project efficiency as per market scenario.
- Works with operational efficiency by identifying & solving complex technical problems and dependencies.
- Led a cross-functional team to successfully deliver a high-impact projects, exceeding client expectations.
- Successfully completed 10+ OEM projects along with multiple integration projects.

PROJECTS

2021-Current

Description:

- Spearheaded the development of a navigation app for vehicle head units and clusters, utilizing a range of technologies such as projection and embedded systems. This project caters to leading manufacturers of two-wheelers, four-wheelers, and electric vehicles and is compatible with Android, iOS, AOSP, Android Auto, and CarPlay.

Role:

- Develop project plans, including goals, timelines, deliverables, and resource allocation.
- Engaged in regular meetings with clients to share project status updates and ensure timely deliverables according to well-defined milestones.
- Identify and manage project stakeholders, ensuring their needs and expectations are met. Communicate project status, risks, and issues to stakeholders in a timely manner.
- Coordinating closely with development team to address various issues & implement planned features for timely customer releases.
- Spearheaded initiative to develop advanced navigation features, engaging clients throughout the process using Agile methodology.
- Delivered comprehensive navigation integration support to various OEMs, including electric two-wheeler and four-wheeler manufacturers globally
- Collaboration/Alliance with technical partner to understand their offering and add that in the roadmap of product, which bring value to the business. Support Development Team with the integration document understanding as and when required.

2018-2020

Description:

- Contributed to the development of a predictive range solution for electric vehicles, encompassing the integration of data from the vehicle cloud.

Role:

- Collaborated with various partners to resolve anomalies promptly.
- Presented the solution for various connected vehicles to clients.
- Directed the project for navigation leveraging proprietary mirroring technology with a prominent four-wheeler OEM.
- Engaged in client-side navigation testing, conducted regression testing, and ensured quality control.

2014-2017

Description:

- Pioneered the development of first navigation solution for a two-wheeler OEM utilizing Bluetooth technology.

Role:

- Comprehended client requirements and developed appropriate solutions, participating in client-side testing.
- Collaborated with the development team to ensure the timely delivery of features and effective resolution of issues.
- Contributed to the creation of a web tracking portal, acting as a comprehensive solution for viewing vehicle tracking information.
- Delivered daily status updates to the development team regarding detected bugs.

2012-2013

Description:

- Played a pivotal role in developing a custom smartphone application with a fleet tracking system, dispatching jobs to drivers based on their availability.

Role:

- Authored test cases for functional and regression testing of the application.
- Evaluated web and mobile applications, participated in cross-browser testing, and conducted regression testing.
- Collaborated on the IoT device telematics vehicle tracker utilizing TCP/IP and UDP protocols.
- Tested advanced features such as vehicle immobilization using a relay.
- Worked on advanced trackers that read vehicle information via the OBD port.
- Collaborated with the core data team to ensure the quality control of POI (Point of Interest) data utilizing the MapInfo tool.
