SUMMARY

Results-driven **Python Developer** with **6 months of experience** in building **software solutions**, focusing on **Deep Learning** and **Generative AI**. Proficient in creating **chatbots**, working with **MySQL databases**, and developing **RESTful APIs**. Skilled in leveraging **Python tools and libraries** to create **efficient and reliable applications**. A **fast learner** with a strong foundation in coding, eager to contribute to challenging projects.

EDUCATION

Vellore Institute of Technology, Bhopal

Bachelor of Technology in Electronics & Communication Engineering

Cumulative GPA: 7.54/10

October 2020 - July 2024

Bhopal, Madhya Pradesh

SKILLS

Technical Skills: Python, MySQL, Pandas, NumPy, Matplotlib, MS Excel, Flask, Scikit-learn, TensorFlow, LangChain, Transformers, Diffusers

Versional Control: VS Code, Git, GitHub

Relevant Coursework: Object-Oriented Programming, Database Management System, Machine Learning, Deep Learning, Generative AI, RESTful API Development

EXPERIENCE

BDO India LLP

Python Developer Intern

March 2024 - Sep 2024

NOIDA (ONSITE)

- Developed and deployed **chatbots** to enhance **user interactions** and **automate responses**.
- Designed and implemented **RESTful APIs** for seamless **data integration** and interaction within applications.
- Created **Python scripts** to organize and process data from invoices, utilizing **Pandas** and **OCR technology** for efficient data extraction.
- Used **Label Studio** and **Doccano tools** for precise **data annotation** and labeling

PROJECTS

QA-Bot [Python](#), [Chroma DB](#), [LangChain](#), [HuggingFace Embeddings](#), [PaddleOCR](#), [Flask](#)

July 2024

- Design and implemented a **Flask-based** service for processing **PDF documents**, including text extraction using **PaddleOCR** and embedding generation with **HuggingFace models**, enabling efficient text **conversion** and storage.
- Developed a custom **question-answering (QA) system** leveraging **language models** and **Chroma vector database**, facilitating **accurate retrieval** of information from processed documents.

Sentiment Analysis [Python](#), [Pandas](#), [spaCy](#), [scikit-learn](#)

April 2024

- Developed and deployed a **Flask API** for **real-time sentiment analysis** of **movie reviews**, achieving **88% accuracy** using a **Logistic Regression model**. achieving an **accuracy of 88%**. Integrated API for seamless interaction for real-time sentiment prediction.
- Implemented text preprocessing with **spaCy** to clean and tokenize reviews and utilized **CountVectorizer** for **feature extraction**, which significantly improved prediction accuracy on the **IMDb dataset**.

Speech to Speech Bot [Python](#), [PyTorch](#), [Transformers](#), [SpeechRecognition](#), [Pytsx3](#)

Nov 2024

- Developed a **Speech-to-Speech AI assistant** enabling real-time speech-to-text conversion and **dynamic voice responses** using **Transformer-based language models** for seamless voice interactions.
- Integrated **Pytsx3** for dynamic **text-to-speech synthesis** and developed robust **error-handling** mechanisms to ensure reliable performance in diverse and noisy environments.

CERTIFICATIONS

- Develop Skills with Large Language Models, LinkedIn Learning, Oct 2024
- Linux Command Line Terminal, Udemy, July 2022

LANGUAGES KNOWN

- English, Hindi
