OBJECTIVE

Business Analyst with over 3.7 years of experience in business analysis and data analytics. Proficient in product strategy, Agile methodologies, Power BI, and SQL. Expertise in collaborating with cross-functional teams to develop impactful products and utilize data-driven insights for business growth.

SKILLS & TECHNOLOGIES

- Product & Agile Management: **Jira, Confluence, Roadmap Planning, User Stories, SDLC, Azure DevOps**
- Data Analysis & Visualization: **SQL, Power BI, Excel, Google analytics**
- Stakeholder Collaboration & Decision Making
- Documentation & Testing : **BRD, FRD, UAT, Test Case Design**
- Process & Workflow Design: **MS Visio, Figma, Draw.io**
- ITSM & Platform Management: **ServiceNow, Mainframe, SharePoint**

EXPERIENCE

- **Conduent Business services India LLP** 06/2023 - Presently
Business Analyst
 - Facilitated stakeholder and client collaboration to align product objectives for health and software SaaS projects (US clients):
 1. **SaaS - health analytical platform.**
 2. **SaaS-based payment processing for medical billing.**
 3. **Platform migration from RKS to DB2.**
 - Gathered business needs, created BRDs, FRDs, and maintained detailed user stories.
 - Assisted in defining feature priorities, roadmap planning, and execution tracking using Jira, Azure DevOps, in an Agile framework.
 - Defined requirements for large-scale system migration, enhancing efficiency and scalability.
 - Utilized SQL and Power BI for trend analysis, user behavior insights, and performance evaluation.
 - Identified operational inefficiencies and implemented automated workflows for process optimization using MS Vision and Power Automate
 - Conducted quality checks, developed test cases, and validated system performance through UAT to ensure functionality.
 - Supported Agile ceremonies to enhance team delivery and communication.
- **Progressive software Solutions** 01/2022 - 5/2023
Business Analyst
 - Collaborated with cross-functional teams to document requirements in functional requirement documents.
 - Facilitated stakeholder and client collaboration to align project objectives for EdTech software development projects (UK clients):
 1. **AI-based recommendation engine for courses.**
 2. **Content management system for online learning platforms.**

- Created process maps using Draw.io to visualize workflows and identify bottlenecks.
- Supported project managers in tracking progress and timelines through Jira.
- Identified operational gaps between current and desired future states.
- Designed test plans, scenarios, scripts, cases, and results matrices for system validation.
- Gathered end-user feedback on usability issues related to applications and systems.

• **6D Technologies** 01/2020 - 02/2021
Intern

• **UST** 04/2021 - 08/2021
Trainee
