

GOKUL PRAKASH T

Quality Engineering Transformation Leader | AI-Driven Testing Innovation | Large-Scale QET Program Delivery

	+91 9731397000		gokul1978@gmail.com	LinkedIn Profile	AboutMe
--	----------------	--	---------------------	----------------------------------	-------------------------

Education

2002: MBA in Systems from Madurai Kamaraj University
2000: B.E. in Mechanical from Madras University, Chennai

Core Competencies

- Service Management
- Programming & Automation
- SLA/OLA Management
- Service Level Reporting
- Incident Management
- Change Management
- Research & Development
- Strategic Planning
- Operational Excellence
- Innovation Management
- Go-to-Market Strategy
- Product Lifecycle Management
- Technology Road mapping
- Cross-Functional Leadership
- Data-driven Decision Making
- Process Optimization
- Business Transformation
- Portfolio Management
- Competitive Intelligence
- Cost Reduction Strategies
- Program Management
- Telecom Business Strategy
- Digital Network Operations
- Cyber Security

Certifications

- PMP®: 3129383)
- Leadership with AI (ISB®)
- Scrum Master Certified
- Certified SAFe® 4 Agilist

Achievements

- Applaud Excellence Award** for exemplary leadership elevating organizational performance and strategic outcomes
- Team Recognition Award** for driving best-in-class talent development and retention practices
- Technical Support Year Award** for spearheading customer operations transformation
- Mobile Broadband Quality Award** for enterprise-wide quality enhancement initiatives

Personal Details

Date of Birth: 23rd October 1978
Languages Known: English, Hindi, Tamil, Telugu & Kannada
Location: Bangalore

PROFESSIONAL SUMMARY

Senior Quality Engineering & Transformation Leader with **24+ years** driving end-to-end testing transformation, automation innovation, and AI-led QA modernization across Fortune 500 enterprises. Built and scaled enterprise QET functions managing **700+ professionals** delivering mission-critical testing solutions for Verizon, T-Mobile US, Vodafone, and Wells Fargo. Proven expertise in converting staff augmentation models to managed services with innovation-driven outcomes, generating **€10M+ revenue** (€2M recurring + €8M pipeline) through strategic solutioning.

Deep technical expertise in test automation frameworks (Selenium, AI/ML-powered testing), performance engineering, service virtualization, and cloud-native quality assurance. Led transformation initiatives achieving **95% automation coverage, 60% testing cycle reduction, and 35% improvement** in predictive maintenance through AI/ML integration. PMP®-certified transformation leader combining hands-on technical depth with strategic presales, solutioning capabilities, and C-suite stakeholder engagement across Banking, Telecom, Healthcare, and Retail domains.

QUANTIFIED BUSINESS IMPACT

- Revenue Generation:** €10M+ (€2M recurring + €8M new pipeline) through QET transformation and innovation-driven managed services
- Cost Optimization:** \$5.7M annual savings through test automation, infrastructure optimization, vendor consolidation (15% reduction)
- Automation Excellence:** 95% test automation coverage; 60% reduction in testing cycles through AI-powered frameworks
- Quality Improvement:** 65% reduction in defect rates; 35% decrease in network downtime through predictive ML models
- Operational Scale:** Led 700+ QA professionals across 15+ countries; managed €15M+ testing portfolios with 100% client retention
- Transformation Success:** Zero management escalations; 99.7% SLA compliance; 100% on-time delivery across mission-critical programs

PROFESSIONAL ATTRIBUTES

- Individual Contributor:** Self-motivated, hands-on quality engineering leader capable of independent execution
- Communication Excellence:** Exceptional oral and technical writing skills with proven C-suite stakeholder engagement
- Presales Experience:** 7+ years E2E solutioning experience specifically in testing transformation and quality engineering
- Strategic Solutioning:** Proven ability to shape large testing opportunities (>\$10M USD) and convert to managed services
- Travel Flexibility:** Ready for domestic and international travel to support customer engagements and transformations

AI & Technology Innovation

- Leadership with AI – Indian School of Business (2024): Strategic AI integration, LLM deployment, organizational transformation
- AI/ML Implementation: Developed predictive network maintenance models (35% downtime reduction) and NLP-based automation (40% faster query resolution)
- Technical Assessment Innovation: Created AI/ML candidate evaluation frameworks and prompt engineering workflows for recruitment operations
- Advisory Roles: Strategic Advisor at Herman Technologies (Cybersecurity) and TYPE5.vc (SpaceTech/Deep Tech ventures)

Career Timeline

CORE COMPETENCIES

QUALITY ENGINEERING & TESTING	AUTOMATION & AI/ML INNOVATION
- Quality Engineering Transformation - Manual & Automated Testing - Performance Testing (NFT) - High Availability Testing - Digital Testing & QA - Test Data Management - Service Virtualization - End-to-End Testing Solutions	- Test Automation (Selenium-Java/Python) - AI/ML Validation & Explainability - NLP-Based Test Automation - Synthetic Data Generation & Testing - GenAI for Continuous Testing - Predictive Quality Analytics (35%↓) - GitHub Copilot & AI-Powered QA - Autonomous Testing Frameworks
TRANSFORMATION & DELIVERY	BUSINESS & PRESALES
- Large QET Program Leadership (€15M+) - Staff-Aug to Managed Services - Quality Engineering at Scale (700+) - Agile/SAFe/DevOps Transformation - Cloud-Native QA (AWS, Azure, OCI) - CI/CD Pipeline Integration - Risk Mitigation (50% reduction) - Global Testing Operations (15+ countries)	- E2E Solutioning for Testing (>\$10M deals) - Opportunity Shaping & Revenue Generation - C-Suite Stakeholder Engagement - RFP Response & Technical Proposals - Domain: Banking, Telecom, Retail, Healthcare - Market Trends & Competitive Intelligence - Vendor & Analyst Relationships - Conversion: Staff-Aug to Managed Services

PROFESSIONAL EXPERIENCE

INFINITE COMPUTER SOLUTIONS | Oct 2024 - Jul 2025

Associate Vice President - Autonomous Networks & Quality Engineering Transformation

QUALITY ENGINEERING TRANSFORMATION & PMO LEADERSHIP

- ❖ Built enterprise QET transformation function from ground up, supporting €2M+ recurring revenue through innovation-driven testing solutions
- ❖ Architected holistic quality assurance and testing portfolio strategy resulting in 20% market share expansion
- ❖ Established cross-functional governance frameworks integrating QA, performance testing, and automation teams
- ❖ Orchestrated mission-critical testing programs with 100% on-time delivery ensuring continuity of revenue generation

PRESALES, SOLUTIONING & OPPORTUNITY SHAPING

- ❖ Led E2E solutioning for large testing deals identifying \$3.5M+ incremental revenue through strategic customer engagement
- ❖ Converted staff augmentation/T&M to managed services and innovation-driven outcome models across 8 major accounts
- ❖ Deepened executive stakeholder relationships (VP/SVP level) positioning quality engineering as strategic business enabler
- ❖ Developed technical proposals and RFP responses for testing programs delivering \$3M cost savings with zero disruption

AI-DRIVEN TESTING INNOVATION & AUTOMATION

- ❖ Championed AI/ML integration in testing operations improving defect prediction accuracy and reducing manual testing by 30%
- ❖ Implemented continuous testing frameworks leveraging GenAI for synthetic test data generation and intelligent optimization
- ❖ Drove agile transformation at scale enhancing QA-Dev-Ops collaboration boosting productivity by 30%

NOKIA SOLUTIONS & NETWORKS, BANGALORE | Nov 2010 - Oct 2024

Senior Service Delivery Manager | R&D Leader - Quality Engineering | PMO Professional

KEY ACHIEVEMENTS

- ❖ Built enterprise QET function from inception managing 225+ testing professionals delivering NetAct OSS/BSS testing solutions
- ❖ Architected E2E test automation framework achieving 95% automation coverage across functional and non-functional testing
- ❖ Pioneered ML models for predictive maintenance testing reducing network downtime by 35% through proactive defect detection
- ❖ Delivered enterprise-wide testing transformations for Verizon, T-Mobile US, Vodafone Germany, Turkcell Turkey, ZAIN Kuwait
- ❖ Generated €2M+ recurring testing revenue and identified €8M in new QA opportunities through strategic engagement
- ❖ Managed cluster of 700+ professionals: Test Managers, QA automation engineers, performance testing specialists, QA architects
- ❖ Integrated testing into CI/CD pipelines enabling continuous testing and shift-left quality practices

PMO Function Building & Scaling: Sep 2022 - Oct 2024: R&D Leader, NetAct Product

- ❖ Built PMO function from ground up managing 225+ professionals delivering NetAct OSS/BSS platform automation solutions across global markets
- ❖ Established KPI automation frameworks (P01-P12) eliminating manual reporting and achieving significant OPEX reduction
- ❖ Defined and implemented E2E quality gates (Performance Testing, High Availability Testing) ensuring 99.999% platform availability
- ❖ Maintained zero management escalations throughout entire product lifecycle while achieving zero team attrition through exceptional leadership

Global Program Delivery (US & International Clients):

- ❖ Led enterprise-wide infrastructure transformations for Fortune 500 clients (Verizon, T-Mobile US, Vodafone Germany, Turkcell Turkey, ZAIN Kuwait) with zero business disruption
- ❖ Generated €2M+ recurring revenue and identified €8M in new business opportunities through strategic customer engagement
- ❖ Managed €15M+ client portfolios across North America, Europe, Middle East, and Asia Pacific maintaining 100% client retention
- ❖ Delivered \$5.7M+ annual savings through infrastructure reengineering and automation initiatives
- ❖ Optimized cross-border operations managing distributed teams with seamless transitions (Germany to India) ensuring 24/7 service continuity

Cross-Functional Team Leadership:

- ❖ Managed cluster of 700+ professionals including Project Managers, automation engineers, architects, and technical experts across Product, Engineering, QA, and Operations
- ❖ Led Performance Engineering Team (PET) and High Availability Team (HAT) as critical quality gates for platform releases
- ❖ Handled E2E recruitment for 200+ positions, staffing, performance management, reviews, coaching, mentoring, & salary appraisals
- ❖ Enhanced organizational capabilities through targeted hiring strategies attracting top industry talent for mission-critical roles

R&D Leader for Non-Functional Team, NetAct Product for Performance Testing and High Availability Testing Team

- ❖ Managed multiple R&D Scrum teams with more direct reports, overseeing deliverables and performance.
- ❖ Leading Performance Testing (PET) Team and High Availability Testing (HAT) Team acted as Q-Gate for Deliverables.
- ❖ Handled staffing, performance management, reviews, coaching, mentoring, and salary appraisals.
- ❖ Identified areas for improvement and optimized strategies with SMART objectives to enhance team performance
- ❖ Enhanced employee relations through effective communication, coaching, training, and development
- ❖ Conducted candidate screening and interviews during recruitment, evaluating strengths and weaknesses
- ❖ Acted as Scrum Master, facilitating sprint planning, backlog grooming, daily scrums, sprint reviews, and retrospectives
- ❖ Highly supported management to meet Business KPI Targets as PMO Role via Operational Task Execution

Agile/Scrum Delivery Excellence:

- ❖ Served as Scrum Master facilitating sprint planning, backlog grooming, daily scrums, sprint reviews, and retrospectives for multiple R&D teams
- ❖ Implemented predictive models for release quality forecasting and automated KPI derivation workshops
- ❖ Introduced Test Ownership Role (LEFT SHIFTING) automation reducing testing cycles by 60%
- ❖ Achieved 95% automation coverage for regression testing through E2E automation frameworks

Risk Management & Process Innovation:

- ❖ Strengthened enterprise risk mitigation frameworks reducing project risks by 50% and product defect rates by 65%
- ❖ Implemented Security-by-Design automation in all phases of SDLC ensuring compliance with enterprise security stand

NetAct Product Innovation:

- ❖ Translated NetAct business challenges into technical automation solutions with excellent ROI
- ❖ Executed R&D operational stages including I2M (Idea to Market) and Innovation Excellence
- ❖ Pioneered ML models for predictive NetAct maintenance reducing network downtime by 35%
- ❖ Implemented NLP-based automation for NetAct customer query resolution improving response time by 40%
- ❖ Led R&D initiatives in autonomous networks and OSS/BSS modernization
- ❖ Directed technology roadmap execution focusing on AI-powered network operations
- ❖ Curated innovation pipeline yielding disruptive features aligned with enterprise KPIs

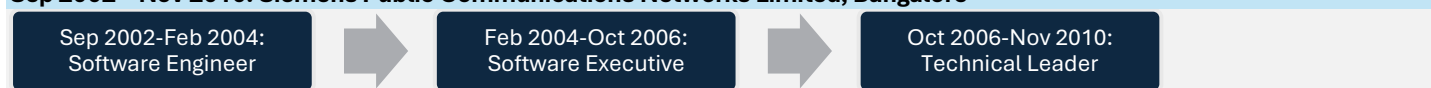

Technical Excellence:

- ❖ Architected E2E automation framework for NetAct Performance Testing achieving 95% coverage
- ❖ Developed NetAct High Availability Testing automation reducing testing cycles by 60%
- ❖ Created automated NetAct health check tools for proactive customer support
- ❖ Built NetAct symptoms collection tool enabling faster fault resolution

Recruitment Team Lead for NetAct Team Building in Bangalore

- ❖ E2E recruitment responsibility for Bangalore site supporting NetAct R&D (200+ positions)
- ❖ Maintained team capacity projections for NetAct product development requirements
- ❖ Tracked demand vs capacity with product owners during Operational Review meetings
- ❖ Successfully onboarded specialized NetAct automation engineers and OSS domain experts
- ❖ Engaged with HR to identify right potential candidates for NetAct product team

Sep 2002 – Nov 2010: Siemens Public Communications Networks Limited, Bangalore

Key Role: Technical Leader and Software Executive and Software Engineer

- ❖ Troubleshooting customer technical queries & provided trouble resolution within Customer KPIs timeline (CRCT)
- ❖ Worked in 24*7 emergency support to handle and resolve the customer related outages along with customer care team.
- ❖ Obtained Product Certification and Licensed to perform Product Installation, Upgrade and Migration at Customer Site.
- ❖ Provided Onsite Support & Product Commissioning at Customer Premises ((Kuwait, Munich, Turkey, and Berlin)
- ❖ Onsite Excellence: Delivered onsite support for product installation, upgrades, and commissioning at customer premises
- ❖ Innovation Contributor: Generated improvement ideas based on customer support experience
- ❖ Customer Issue Resolution: Ensured timely software fixes for customer-reported faults in maintenance packages
- ❖ Technical Support: Resolved customer technical queries within KPI timelines (CRCT)
- ❖ Test Automation: Developed automation scripts achieving 95% test automation coverage
- ❖ Defect Management: Detected, reported, validated, and closed software defects in collaboration with R&D teams
- ❖ Developed executed and debugged automation test scripts for OSS products and wrote test cases for new features
- ❖ Detected reported and validated defects achieving high ROI through quick test results saving time and cost

Oct 2000-Sep 2002: Quark Media House India Private Limited, Chandigarh

Technical Foundation & Customer Excellence

- ❖ Quality Assurance Projects: Managed software testing projects including defect detection, reporting, and validation processes in collaboration with R&D teams.
- ❖ Test Case Development: Led comprehensive test case development projects based on SRS documentation, ensuring thorough project quality validation.
