WORK EXPERIENCE

DevOps Engineer

HealthPlix Technologies

09/2023 - 05/2024

Tasks

- Automated AWS Code Pipeline using Terraform scripts, leveraging Terraform workspaces and modules for AWS ECR, ECS, and pipeline components.
- Setup Linux server for Dev and stage environment.
- Implemented Web Application Firewall (WAF) for enhanced security measures
- Experienced in implementing high-scale cloud architectures using modern, cloud-based container platforms (PaaS/SaaS), such as Docker.
- Experienced in blue-green deployment, a production deployment model that reduces downtime and risk by running two identical production environments.
- Created the Jenkins pipeline for Nodejs project.

DevOps Engineer

BYJU'S – Think & Learn Pvt. Ltd

10/2021 - 09/2023

Tasks

- Project Onboarding (setting up repos/ branches , setting up branch policies, giving access to different users, creating self hosted agents)
- Maintained git workflows of version control(source code management) like Github .
- Developed and maintained fully automated CI/CD pipelines for code deployment using Jenkins with Bash scripting.
- Created Fully automated Pipeline from code pushing to Build , publishing artifact, performing Security Scan and then deploying it into different Environments.
- Written various Script in bash for Automation and Pipeline related task.
- Handling all security related tasks like SonarQube integration with automated pipelines.
- Successfully handled all troubleshooting task and also had worked on Linux Environments task.
- Built and deployed Docker containers to break up monolithic app into microservices, improving developer workflow, increasing scalability, and optimizing speed.
- Successfully build Nodejs, python and java based project.
- Created MongoDB, MySQL database for Dev ,stage and prod environment.
