Professional Summary (DevOps Engineer)

Seasoned DevOps Engineer with over 2.3 years of practical expertise in establishing end-to-end DevOps CI/CD pipelines. Proficient in integrating Git, Maven, Jenkins, Ansible, Docker, Tomcat, Terraform, Kubernetes, and AWS Cloud to automate deployment processes. Experienced in building AWS infrastructure from scratch, migrating on-premises data to the cloud, and automating mission-critical projects across large-scale infrastructure using diverse AWS services.

Education

St. Mary's Group of institution
CSE, B.tech
2018-2022

Lalitha Junior College
MPC, Intermediate
2017-2018

Z.P.High School
SSC,
2015-2016

Experience

Connate Software Solution

Hyderabad, Telangana

DevOps Engineer

July 2022 – Nov 2024

- In my capacity as a DevOps Engineer, I assume a critical role in upholding the security, reliability, and efficiency of our software deployment and infrastructure management. My responsibilities span diverse areas, emphasizing proactive security measures and the seamless operation of continuous delivery pipelines. Here's a breakdown of my key duties:
- **Cloud Infrastructure Setup:** Deployed and configured AWS services, including EC2 for computer resources, S3 for storage, RDS for relational database management, and VPN for secure network connections.
- **Infrastructure as Code (IaC):** Leveraging Terraform, I efficiently create and manage infrastructure resources, ensuring repeatability, scalability, and consistency across all environments.
- **IAM Implementation:** Managed access and security using AWS IAM to control permissions and ensure secure interactions between services.
- **Microservices Management:** Implemented and managed microservices architecture using AWS Lambda and API Gateway to handle business logic and API management.
- **AWS Monitoring Tools:** Utilizing AWS monitoring tools, such as Amazon CloudWatch, I oversee and manage cloud resources and applications. This includes monitoring key metrics and logs, setting alarms, and automatically reacting to changes in AWS environments to maintain operational health and performance.

- **Automation & Optimization:** Automated infrastructure provisioning and scaling using AWS tools, ensuring the system is efficient, cost-effective, and resilient to varying loads.
- **Configuration Management:** Through the implementation of Ansible, I automate and standardize server and application configurations. This minimizes human error and ensures uniform system configurations in compliance with security policies.
- **Tomcat Servers Management:** I am responsible for the administration and maintenance of Tomcat servers, including deployment, configuration, monitoring, and optimization of web applications. This ensures that web services are always available, secure, and performing at their best.
- **Container Orchestration:** I manage ECS for containerized applications, focusing on optimizing resource utilization and scaling to handle varying workloads efficiently.
- **AWS EKS Management:** I ensure the deployment, maintenance, and optimization of applications on AWS EKS, guaranteeing their high availability and scalability to meet the demands of our operations.
- **Nagios:** I utilize Nagios for comprehensive IT infrastructure monitoring, ensuring timely detection of network and server issues. My expertise with Nagios allows for the customization of alerts and checks, ensuring critical systems are closely monitored for uptime, performance, and potential security breaches

My role as a DevOps Engineer is pivotal in integrating security best practices with agile development and operational processes, creating a resilient infrastructure conducive to continuous innovation.

Skills

- **AWS Cloud:** Elastic Compute Cloud (EC2), Elastic Load Balancer (ELB), Auto Scaling, EBS Volumes, Virtual Private Cloud (VPC), Simple Storage Service (S3), Identity and Access Management (IAM), Route 53, Relational Database Service (RDS), Elastic File System (EFS), Simple Queue Service (SQS), Simple Notification Service (SNS), Simple Email Service (SES), Cloud Watch, Cloud Front, Cloud Formation, CloudTrail, Elastic Container Service (ECS). Key Management Service (KMS).
- **Azure Cloud:** Azure Resource Management (ARM), Azure Virtual Machines (VMs), Azure Blob Storage, Azure Load Balancer, Azure SQL Database, Azure Container Instances (ACI), Azure DevOps Services, Azure Pipelines, Azure Monitor, Azure Log Analytics, Azure Cost Management, Azure Firewall.
- **DevOps Tools:** GIT (Distributed version control tool), Ansible (Configuration Management Tool), Docker (Container Based Tool), GitLab, GitHub, Jenkins (Continuous Integration tools), ECS, EKS, Kubernetes (Container Orchestration Tool), Maven (Build Tool), Terraform (Infrastructure Management Tool).
- **Kubernetes (K8s):** Resource Isolation: Namespaces Service objects: Virtual IP/Cluster IP, Node Port, and Load Balancer. Volumes: empty Dir, host Path, and persistent Volumes Health check mechanisms: Liveness probes and Readiness probes. Managing configuration data: Secrets and ConfigMaps. Objects: Jobs, Parallelism, Cron Job & Init containers, Resource Quotas Understanding of pod life cycles, pod conditions, and container states.
- **Terraform:** HCL (Hashi Corp Configuration Language), Resource Provisioning, Module Creation and Usage, Variables and Data Types, Expressions and Functions, State Management, Remote Backends, Providers, Dependency Management
- **Operating Systems:** RedHat Linux, CentOS, Ubuntu, Amazon Linux & Windows.
- **Web services:** Apache, Nginx, Tomcat
- **Programming Languages:** Java, Shell Scripting

Personal Skill

- Fast learner
- Dedication for Work
- Effortless multi-tasker
- Great interpersonal and communication skills

Projects

Role: Automation of Distribution Network and Delivery

Duration: 2022 – 2024

Description: Nikitha provides high-quality natural oils that enhance well-being and promote healthy living. Our mission is to offer a diverse range of oils sourced from nature, ensuring purity and sustainability in every bottle. We believe in the power of natural ingredients and strive to educate our customers on their benefits through engaging content and community interactions.

Personal Details

Date of Birth	: 10/07/2000
Gender	: Male
Nationality	: Indian
Languages known	: Telugu and English
Mobility	: Ready to reallocate in India and overseas.

Declaration

I hereby declare that the above-mentioned information is correct to my knowledge, and I bear the responsibility for the correctness of the above-mentioned particulars.

Place: Hyderabad
