Education

B.Tech, Arya Institute of Engineering Technology and Management

2017 – 2021

Professional Experience

Software Engineer, Omniflo

04/2022 – present

Project: Beagle

Bengaluru, India

- Developed backend infrastructure using FastAPI framework to process and extract data from printer spool files
- Worked on microservices architecture with APIs for inter-server communication, enhancing scalability and system integration

Tech Stack: Python, MySQL, FastAPI, Docker, SQLAlchemy, Redis Queue, Redis Worker

Project: Engine

- Developed and designed backend infrastructure using the Frappe Python framework.
- Collaborated with founding members and operation teams to enhance operational efficiency by identifying pain points and implementing effective solutions that improved productivity and simplified workflows.
- Partnered with the frontend team to make workflow decisions and create efficient REST APIs.

Tech Stack: Python, MariaDB, Frappe, Jinja2, JavaScript, jQuery, HTML, CSS

Projects

ttyping 

ttyping is a terminal tool designed for typing practice

Secret Kepper 

A simple website to symmetrical encrypt and decrypt data based on the user password using AES

Contribution

ERPNext

- Contributed to opensource ERPNext repository.

Skills

Python • SQL • HTML & CSS • Javascript • Docker • FastAPI • Jinja • Redis

Awards

Code Commander, Omniflo

2023

Received the prestigious 'Code Commander' award from Omniflo, acknowledging exceptional leadership and coding
