Work Experience:

S . No	Company	Designation	Duration
1	Logus-IMS Technologies	DevOps Engineer	March 2023 to Feb 2024
2	HGS Limited	Deployment Engineer	July 2021 to Oct 2022

Technical Skills

- Operating systems : **Linux and Windows**
- SCM Tools : **GitHub , Git**

Resume

- Continuous Integration : **CI/CD, Jenkins, GitLab** (Basic)
- Build Tools : Maven
- Cloud Environments : **AWS**
- Configuration Management tool : Ansible (Basic)
- Infrastructure as Code (IAC) : **Terraform**
- Orchestration Tools : **Kubernetes, EKS, ELK** (Basics)
- Containers : **Docker Product & Docker Swarm**
- Scripting Languages : Shell Scripting
- Web/ Application Server : Apache / Tomcat, Kafka (Basics).
- Monitoring Tool : **Nagios, Prometheus, Grafana, Site 24/7, Cloud Watch**

Two years of functional experience in Manufacturing industry:

- Installed, configured and administered CI tools like **Jenkins** for automated **pipeline builds**.
- Setup and managed **Docker containers** for Django and React Applications into **Kubernetes Pods**.
- Managed **Deployment, Replication, Autohealing, Auto Scaling** for **Kubernetes Cluster**.
- **Build Kubernetes Cluster** on AWS from Scratch with **Minikube**.
- Managed network and Services with Host IP allocation through Proxy on AWS EC2 and Route53.
- Configuring Jenkins job with related plugins for Builds, Testing, Artifact creation and **Continuous Deployment** to accomplish the complete **CI/CD**.
- Experience in working on source code management tools like **GitHub**
- Expertise in configuring and managing services like **AWS EC2 using AMI's** available. Configured multiple servers depending on application needs using continuous integration tools like Jenkins.
- Configuring alarms and notification services using SNS, **IAM** role.
- Creating IAM users and policies for programmatic access to RDS instances, S3 buckets etc.
- Experience configuring and updating the servers using **configuration management** tools like Ansible.

Resume

- Experienced with **docker**, creating containers attach volumes, creating docker images from **docker file** and published **docker images** to **docker hub**.
- Experienced with **Kubernetes** Creation of pods, deployment, services, **Rolling Updates**, Load Balancer, **AutoScaling**.
- Experienced with **Infrastructure as Code (IaC) Terraform**, launch Instance create VPC with subnet, Internet gateway, route table and security group.
- Strong ability to troubleshooting the build and deployment issues.

Educational Qualification:

B.Com *Veerashaiva Degree Collage* - Vijayanagara Sri Krishnadevaraya University Ballari

Project Summary

✦ Project:01

Project : **EFI (Electronics for imaging)**
Duration : March 2023 to Till Date
Role : DevOps Engineer
Skills : AWS, Git, Docker, Kubernetes, CICD, Terraform.

Description:

EFI is a truly innovative project for imaging. Scanning printing . It is the most happening Application and devices all over the world.

Responsibilities:

- I have been working closely with a team whose key responsibilities are creating and managing infrastructure for developers, testers and DB administrators in a way to accomplish automation.
- Provisioned **AWS** services and resources using Terraform (EC2, EBS, S3, Auto Scaling, Elastic Load Balancing, VPC, Subnets, Routetable, ELB, Security Group)
- Experienced in Designing and Implementing **CICD Pipelines** for a **Kubernetes** Based **Micro Services Architecture**, Reducing Deployment Time and Increasing Deployment Frequency.

Resume

- Collaborated with development teams to develop strategies for deploying applications across **multiple environments** and building **CI/CD pipelines**.
- Involved in Writing **Docker files** to build customized images for creating containers.
- Implemented **Docker** containers to create images of the applications and dynamically provision slaves to **Jenkins CI/CD pipelines**
- Responsible for creating of **Dockers images** and pulling images from **Docker Registry**.
- Deploy Docker images to **Kubernetes** cluster,creation of pods,Deployment services,load balancer.
- Cluster Management: Deploy, configure, and manage Kubernetes clusters, including master and worker nodes
- We are using **Ansible** as primary automation tool in configuring and deploying to several environments.
- As most of the infrastructure is hosted in **AWS cloud**, I'm responsible for creating and managing EC2 Instances. Maintaining **AMIs** of the Configured Ec2 instances.
- Ensuring the servers to sustain the load by configuring **Elastic load balancer &Auto scaling**.

✦ Project:02

Project : Loblaws
Duration : **July** 2021 to Oct 2022
Role : **Deployment** Engineer
Skills : Git, Jenkins, Ansible, AWS EC2, VPC, Autoscaling, ELB, CloudWatch

Description: Loblaw is an e-commerce company. These stores carry a variety of goods, but the vast majority of space is devoted to groceries and about a third of each store is set aside for electronics, house wares, drug store pharmacies and clothing.

Responsibilities:

- As DevOps engineer in my team, I have a responsibility in configuring Jenkins jobs in such a way that fetches source code from **Git** repository.

Resume

- Good hands-on experience in creating Jenkins jobs, plug-in installations, setting up distributed builds using master/slave.
- Interacting with developers to sort out issues related to Build Automation.
- Creating the **Jenkins Jobs**.
- Development of **shell scripts** for automation of existing manual processes.
- Experienced in, build and deployment of Java applications on to different environments such as **DEV, QA And UAT**.
- Developed various Playbooks and roles in **Ansible**.
- Experience on **Amazon EC2, Amazon S3, Amazon Auto scaling, IAM, RDS, Route 53, VPC, Amazon Elastic Load Balancing**, and other services of the **AWS** family.
- Created the **VPC's**, configured the subnets, attached the gateway and routing tables to the subnets and deployed the EC2 instances in the subnets created.
- Troubleshoot Daily operational issues in AWS.

Declaration:

I hereby declare that the above stated information is true and correct to the best of my knowledge

Govinda Raju T
