

GURUBASAVA

OBJECTIVE

I seek challenging opportunities where I can fully use my skills for the success of the organization.

PROJECTS

Cloud-Based Python Scaffold for CI/CD

- Developed cloud-based Python scaffold project within Cloud9 IDE to showcase repeatable development environments for CI/CD workflows
- Implemented best practices for code quality, scalability, and efficient deployment processes
- Demonstrated effective construction of development environments for Continuous Integration and Continuous Development
- Utilized Python and cloud technologies to create a scalable and efficient project framework
- Ensured high code quality and streamlined deployment processes for efficient development workflows

Deploying A Multi-Tier Website Using AWS EC2

- Led the deployment of Company's product on AWS infrastructure, ensuring high availability and scalability.
- Implemented EC2 instances with Auto Scaling for dynamic resource allocation based on demand.
- Configured RDS for MySQL database hosting, ensuring data durability and security.
- Integrated PHP website with AWS environment, optimizing performance and user experience.
- Achieved cost efficiency through automated resource management with Auto Scaling.
- Enhanced infrastructure security by securing communication between EC2 and RDS instances.

AWS CodePipeline Integration with CodeDeploy for Continuous Deployment

- Expertly orchestrated seamless Continuous Deployment (CD) workflows through the integration of AWS CodeDeploy with AWS CodePipeline.
- Utilized cloud-native tools to automate the deployment process, guaranteeing prompt and dependable delivery of application updates.
- Demonstrated passion and expertise in ensuring swift and reliable application updates through the efficient utilization of AWS services.

INTERNSHIP

- AWS Solutions Architect Associate (KGTI Kalaburagi) - Feb. 2023 to May 2023
- Developed foundational knowledge in AWS Solutions Architecture
 - Acquired hands-on experience in implementing cloud solutions

EDUCATION

PDA COLLEGE OF ENGINEERING

2023

BE Mechanical Engineering
6.52 CGPA

SKILLS

Scripting Languages: Python, Bash.

Operating System: Windows, Linux(Ubuntu).

Cloud Platform: AWS (Amazon Web Services), Azure.

Containerisation: Docker, Familiarity with orchestration tool like Kubernetes, Ansible, Jenkins.

Cloud Services: API Gateway, IAM, S3, SNS, SQS, Lambda, RDS, DynamoDB, EKS, ECS.

Version Control: GitHub, Git.

Networking: Understand of TCP/IP, UDP, VLAN, Routing, Load balancing.

Strong Understanding of SQL Programming

DevOps and CI/CD: Knowledge of DevOps methodologies, Continuous Integration/ Continuous Delivery systems.

Solid understanding of Agile Software Methodologies, SDLC.

Excellent interpersonal and Communication Skills.

ACHIEVEMENTS & AWARDS

AWS Cloud Foundation (April 2023).

AWS Cloud Architect (May 2023).

Open Networking Lab (June 2023).

VMware: Cloud and Virtualization Concepts (August 2023).

AWS Cloud Developing (Jan. 2024).
