EXPERIENCE

Software Engineer

In Time Tec

📅 Feb 2022

📍 jaipur

- Proficiency in .NET Framework and/or .NET Core. Strong understanding of C-Sharp programming language and ReactJs.
- Experience with ASP.NET, MVC (Model-View-Controller), or Web API for web development.
- Familiarity with ORM (Object-Relational Mapping) frameworks like Entity Framework.
- Knowledge of front-end technologies such as HTML, CSS, and JavaScript and ReactJs. Experience with database systems like SQL Server, MySQL.
- Collaborated with cross-functional teams to design, develop, and deploy RESTful APIs, enhancing communication between front-end and backend systems.
- Built robust authentication and authorization mechanisms using technologies like JSON Web Tokens (JWT), ensuring secure access to resources.
- Actively participated in code reviews, providing constructive feedback and ensuring adherence to best practices and coding standards.
- Throughout my projects, I consistently applied the SOLID principles, which are a set of guidelines for software design and development, to ensure maintainable, scalable, and robust code.
- Resolved frontend technology bugs and contributed to the implementation of new features.

EDUCATION

Geetanjali Institue of Technical Studies

Bachelor of Technology,Computer Science and Engineering(8.55/10)

📅 Aug 2018 - Aug 2022

📍 Udaipur

SKILLS

Dot Net Core/Framework

SQL

JavaScript

React JS

DSA

HTML, CSS

Python

C-Sharp

PROJECTS

RISE - Child Care Service Management Application

- Led development on "RISE," an application designed in collaboration with the Idaho State government to streamline processes for government officials, child care providers, and parents.
- Empowered users to efficiently track and manage a range of government services and restructure communication flow among 10+ departments such as licenses, documents, and grants, etc and cut down paperwork by 75 percent.

Simplot

- Implemented best practices in coding and design patterns while working with a team of developers.
- Focused on integrating and developing modules for handling different user access levels, ensuring secure and appropriate access to resources.
- Optimized database queries, resulting in a 40 percent performance improvement.

PERSONAL PROJECTS

E-learning System

📅 Feb 2022

📍 Github Link

- During my training, I successfully completed a project using .NET MVC framework. The project focused on creating a comprehensive web application with robust login and logout functionality, catering to three distinct user roles: Teacher, Student, and Admin.

Sport Carnival

📅 January 2023

📍 Github Link

- During my programming experience, I undertook a project centered around a sports carnival, where I utilized the .NET framework to develop a robust application capable of managing multiple events.

CERTIFICATES

- Leetcode- C++ , Problem solving.
- Dot Net Course on UDEMY.
- Coursera- Python for everybody.
