Career Objective

Analytical and detail-oriented recent graduate with a strong foundation in quantitative analysis and financial modeling. Seeking to leverage statistical expertise and market insight as a quantitative researcher to drive data-informed decision making and deliver actionable investment strategies.

Education

- Masters in Financial Engineering - World Quant University (2025).
- Masters in Computer Applications - Central University of Himachal Pradesh (2025).
- Masters in History - University of Hyderabad (2022).

Skills

- **Programming Languages:** C, C++, Python, R, Matlab
- **Financial Expertise:** Derivative Pricing, Stochastic Modeling, Quantitative Trading
- **Analytical Tools:** Financial Analysis, Risk Management, Statistical Modeling
- **Other Skills:** Data Analysis, Machine Learning, Algorithm Design

Academic Projects

- **Pricing OTC Asian Options:** Priced ATM and out-of-the-money Asian options using the Heston and Bates models. Analyzed pricing for various maturities (e.g., 20-day, 60-day).
- **Euribor Rate Simulation:** Simulated daily Euribor 12-month rates over a 1-year horizon using Monte-Carlo methods and the CIR model for 100,000 paths.
- **Machine Learning in Trading Strategies:** Developed a marketing handbook for investment managers on modeling trading strategies using machine learning techniques such as Elastic Nets and Principal Component Analysis (PCA).

Relevant Experience

- Engaged in personal trading, focusing on developing and utilizing derivative pricing models.
- Stimulated stochastic processes to inform trading decisions.
- Experienced in calibrating financial models such as Heston and CIR across various asset classes.
- Performed backtesting on financial models to assess performance and refine strategies.

Personal Information

- **Full Legal Name:** Malavath Hanmanth Nayak.
- **Address:** Nizamabad, Telangana, India 503165.
- **Nationality:** Indian
- **Hobbies:** Chess, Algorithmic Trading, Reading Financial Journals, Hiking, Travelling, Cycling.
