Summary

Data Engineer with 4.5 years of experience in financial and pharmaceutical domains. Expertise in AWS technologies, Python, Spark, SQL, Airflow, Databricks, data modeling, Power BI, Flask API, and Agile methodologies. Demonstrated success in developing scalable and efficient data pipelines and implementing robust data models to enhance business analytics and decision-making.

Experience

Ernst & Young GDS

Trivandrum - Hybrid

Data Engineer

06/2022 - Present

Company Description

- Developed and implemented comprehensive layer-wise ETL data pipelines, extracting data from diverse sources and transforming it for Redshift table for consumption.
- Improved pipeline efficiency by ~45% through optimized Spark configurations and incremental CDC logic.
- Developed dynamic Apache Airflow DAGs to orchestrate and monitor data pipelines, ensuring efficient and reliable data processing workflows
- Built an event-driven data ingestion pipeline to ingest data into the consumption layer using AWS Lambda, AWS Glue, and S3 event notifications.
- Continuously monitored and debugged production issues to ensure smooth and reliable operation of data pipelines.
- Automated deployment of code to higher environments using GitHub, Jenkins, and Terraform, ensuring seamless integration and delivery.

Tata Consultancy Services

Kochi - Remote

Data Engineer

08/2020 - 06/2022

Company Description

- Developed bigdata application implementing business logic using Spark and python which helped in time optimized result by fine tuning spark configurations.
- Extracted insights of emails by utilizing various NLP techniques to pre-process data and applied Topic Modelling using spark ML libraries to improve time performance.
- Advanced network graph was developed using the email dataset which helped in cluster analysis to detect and alert malicious activities.
- Identification of clusters in the dataset based on business logic using Louvain community partition and K-means Clustering algorithms.

Tata Consultancy Services

Kochi - Remote

Data Analyst

02/2020 - 07/2020

Company Description

- Developed and maintained matrix reports using Power BI Report Builder for detailed Volume, Price analysis.
- Designed and implemented interactive visual reports, dashboards, and KPI scorecards using Power BI Desktop.
- Build matrix report using Power BI Report Builder for price analysis using the dataset from Power BI Service

Education

College Of Engineering Pathanapuram

B-Tech: Computer Science

2015 - 2019

Skills

Spark • Python • SQL • Airflow • Streamsets • Databricks • Azure • Jenkins • JIRA • Confluence • Github • CI/CD • Hadoop

AWS - EMR • S3 • Redshift • RDS • Lambda • Glue • SQS • SNS • Code build • Eventbridge

Achievements

- | | | |
|--|--|--|
|  EY Spot Award
Awarded for Excellent performance and commitment throughout the year. |  Arctic code vault contributor (02/2020)
For contributing code to repositories during 2020 GitHub archive program |  Newbie Scholar award (09/2021)
Awarded for excellent performance as fresher. |
