Email: harishharishbr@gmail.com

Address: Viveknagar Robertsonpet KGF

City: Bangalore

LinkedIn: www.linkedin.com/in/harish-b-r-aa64a4218

Objective:

To contribute for delivery excellence in software testing/quality assurance using my technical skills and share the knowledge of QA, experience and customer services to meet goals and objectives of an organization.

Professional Summary:

- Having 4.5 years of total work experience in Manual Testing.
- ADAS are electronic systems (sensors) in vehicle which uses advance technologies to assist the driver.
- ADAS include many active safety features and we can assist the car like google voice assistant.
- Attending Sprint Planning Meeting and Sprint Review Meeting as part of Agile Process.
- Well versed with all stages of Software Development Life Cycle [SDLC] and Defect Life Cycle Management.
- ADAS with camera sensor includes front, rear, side, side.-front, side-rear camera sensors.
- Should conduct manual tests to ensure the software created by developers is fit for purpose and any bugs or issues are removed within a product before it gets deployed to everyday users.
- Analyzing Data model and understand relations between Dimension and Fact Tables.
- Should perform suitable tests without errors, self-review correcting the mistakes and give error free data.
- Final step is to collection of data and delivering the data with error free.

Roles and responsibilities:

Roles

- I worked on the creation of testing the software systems and technical products including vehicles, electronic goods, camera sensors and road markings.
- Designing and testing individual projects and group projects, helped the team when in need.
- Should need to be familiar on ADAS components and the tools used for testing the software.

Responsibilities

As a software test engineer you will need to meet with system users to understand the scope of projects and work with software developers and project support teams, identify business requirement plan projects. Monitor applications and software system carry out stress testing performance testing, run manual tests. Work quicker with the requirements and work in the limited or ordered time, work and maintain discipline.

Professional Experience:

Software Tester in HL Mando Softech Privated Limited from January 2020 To March 2021

Software Tester in HL Klemove Privated Limited from April 2021 To May 2024

Payroll Kennis Works Technologies Privated Limited

Educational Qualification:

BSc Cs from GFGC KGF - July 2019

Technical Skills:

Skills	
SOFTWARE TESTING	ETL\DWH Testing\Manual Testing
PROGRAMMING LANGUAGE	Python, C++
ETL TOOLS	Informatica Power Center
OPERATING SYSTEM	Windows
DATABASE	AWS, Oracle, Teradata
AGILE MANAGEMENT TOOLS	JIRA,TFS
REPORTING TOOL	Tableau Desktop, Tableau Server
TEST MANAGEMENT & OTHER TOOLS	Ground truth, Micosoft Excel, Atom, Spyder,Anaconda prompt, Notepad++

PROJECT- 1

JANUARY 2020 TO APRIL 2024

Advance driver assistance system (ADAS) (Both Companies)

Description:

We use C++ and Python for this projects ADAS is the latest innovation which we worked for korea group. They are electronic systems from the AB Dynamics allowing customners to run their own software programs on power controllers during a test.

Roles and Responsibilities:

- Based on the powerful and easy to use Python and C++ programming language.
- Users can access all of the data capture channels such as SR/BR/AR data was well as motion pack and path following data to perform their own logic and calculations during a test.
- Key features of the system include real-time path following override controls, gear selection override, MP start time override, custom data capture and raw CAN bus access.
- Prevents vehicle from accidental algorithm.

Domain– R&D

Databases– Oracle, Teradata

Role – Manual Tester

Environment – Windows, Ground Truth

PROJECT- 2

MARCH 2020 TO APRIL 2023

Semantic Annotation(Both Companies)

Description:

We use ground truth tool for semmantic annotation. We will annotate or mark all the vehicles like cars, bikes, bicycle, buildings, parking lanes, road in the image.this helps to feed information to the adas vehicle. And helps in assisting the driver with latest methods of driving the vehicle like assisting through voice.

Roles and Responsibilities:

- Analyzing the Mapping Document and finalizing test scenarios. Developed test cases based on Transformation Rules exists in Mapping Document and Design Document.

- Prepared test data when source data is not available according to joining conditions and transformation rules.
- In semantic we mark or annotate the whole image and feed the information the camera sensors.
- Involved in company data load checks.
- Involved in company performance load testing on different data loads.

Domain – R&D
Databases– Oracle

Role – Manual Tester
Environment – Ground truth, Anaconda

PROJECT- 3

APRIL 2022 TO OCTOBER 2023

ATOM (HL Klemove)

Description:

.In atom we have done 2d 3d data annotations it is like black and white box testin. We mark and do annotation in the 2d and view in 3d whether the marking of vehicles and pd(people) are correct.

Roles and Responsibilities:

- Validating the Bounding boxes as part of SCD Type2 validation.
- Preparation of Test Data to perform test validation when data is not available in source tables.
- Involved in Performance load testing.
- Involved in Functional, Non -functional and Sanity Testing in the atom.
- Responsible for reviewing the test cases for team members to ensure high quality deliverables.
- Attending Daily Stand-up Meetings, Sprint Planning Meetings, Sprint review meetings and Sprint retrospective meetings.

Domain – R&D
Databases AWS, Oracle

Role – Manual Tester
Environment – Windows OS

Achievements and Awards:

Completed Data Analytics course in <https://www.mygreatlearning.com/certificate/HOGYQQCZ>. Created a more efficient and correct way of working in the company and impressed the managers. Gained NCC ‘B’ and ‘C’ Certificate and NSS Certificate in my graduation which represents sincerity and discipline.

Participated in training program in ASIT Bangalore for 4 months Certification No.:1901665
Attended Python programming training held through online mode conducted by Besant Technologies for 2 months Certificate ID: BFT174B085

Known Languages:

English, Hindi, Kannada, Telugu, Tamil, Malayalam

Declaration:

I hereby declare that all the details above are correct and true to the best of my knowledge.
