PROFESSIONAL SUMMARY

I am a passionate Front-End Developer with 3+ years of experience in building dynamic, responsive, and user-friendly web applications using React, JavaScript, Redux, HTML, and CSS. Skilled in leveraging modern tools and frameworks such as Tailwind CSS, Redux, and React Hooks to create performance-optimized applications. I enjoy solving complex problems, collaborating with cross-functional teams, and continuously learning about emerging web technologies. Currently, I'm looking for opportunities to work on challenging projects where I can make a meaningful impact.

SKILLS

- **Frontend Development:** React.js, JavaScript (ES6), HTML5, CSS3, Responsive Web Design, Cross-Browser Compatibility
- **UI/UX Design:** Material-UI, Tailwind CSS, User Interface Design
- **Version Control:** Git, SVN .
- **API Integration:** RESTful APIs, JSON, Axios, API Consumption, AJAX
- **State Management:** Redux, Context API
- **Testing:** Jest, React Testing Library
- **Build Tools:** Webpack, Babel, NPM
- **Agile Methodologies:** Scrum, Sprint Planning, Cross-functional Collaboration
- **Performance Optimization:** Web Performance, Code Splitting, Lazy Loading, Image Optimization, Caching
- **Soft Skills:** Problem Solving, Team Collaboration, Clear Communication, Time Management, Adaptability

PROFESSIONAL EXPERIENCE

System Engineer

React.js developer | Tata Consultancy Services

02/2022 - Present

Project name : HDFC Life Insurance Project

- Developed and maintained a highly responsive and user-friendly online insurance portal for HDFC Life Insurance using React.js and JavaScript (ES6), improving the overall user experience and increasing customer satisfaction by 20%.
- Spearheaded the development of reusable React components using React Hooks and Context API, ensuring modular and scalable code.
- Integrated RESTful APIs to enable seamless data exchange between the front-end and back-end, optimizing performance and data accuracy.
- Collaborated with UI/UX designers to enhance the portal's user interface, ensuring accessibility and a visually appealing experience.

- Styled the application using Tailwind CSS, creating a consistent, responsive, and mobile-friendly layout with utility-first design principles.
 - Implemented state management using Redux, streamlining data handling across various parts of the application.
 - Optimized web application performance by 30% using techniques such as lazy loading, code splitting, and image optimization.
 - Worked closely with cross-functional teams in an Agile environment to deliver key features and meet project deadlines, ensuring timely releases and high-quality outputs.
- Utilized Git for version control, enabling efficient collaboration and ensuring code integrity across the team.
- Conducted thorough code reviews and unit testing to ensure code quality, reliability, and maintainability.

WEB DEVELOPMENT PROJECTS (*Personal Projects*)

Forkify Recipe Application: Built a recipe application that enables users to search for dishes, calculate the exact quantity of ingredients based on servings, and view estimated preparation times. Implemented responsive design and state management for a smooth user experience.

Technologies Used : React, HTML, Tailwind Css, RestAPIs.
