PROJECTS

A Novel Grid connected PV system based on Multi level converter get the Maximum Power under partial shading conditions.

The topology not only eliminates the complexity of the reconfiguration structure,but also achieves the ability of higher output power under partial shading conditions.

A Novel Design of Hybrid Energy Storage System for Electric Vehicles.

The proposed system is compared to traditional hybrid energy storage system,showing it has significant advantage of reduced volume and weight.Moreover,the ripple of output current is reduced and the life of battery is improved
