
KANDE HARSHITH

Hyderabad, India 500062 ♦ 8143999930 ♦ kandeharshith70@gmail.com

SKILLS

- Python
- Microsoft Azure (Azure OpenAI, Azure Search Index, Azure Document Intelligence, Azure Databricks, Azure Storage Account)
- Retrieval-Augmented Generation (RAG) methodology
- AWS glue
- PostgreSQL
- Terraform
- Docker
- GIT
- Quart, Flask
- Apache Spark (via Azure Databricks)
- AWS Lambdas
- AWS S3
- CI/CD
- API Gateway
- SQL

PROFESSIONAL SUMMARY

Back-End Developer with **4.2 years of experience** in designing and developing scalable web applications, APIs, and Generative AI solutions. Skilled in building high-performance backend systems integrated with **Generative AI models** to enhance functionality and user experience. Proficient in working with **Azure OpenAI, Azure Search Index, and Document Intelligence** to deliver advanced data-driven applications. Experienced with frameworks like **Flask** and **Quart**, and adept at **data processing pipelines** using **Azure Databricks** and **Apache Spark**. Strong background in cloud platforms like **Azure** and **AWS**, ensuring scalable and efficient deployments. Passionate about creating innovative solutions with clean, maintainable code and following best practices in software development.

WORK HISTORY

Software Engineer, 11/2023 - Current

CGI – Hyderabad, India

- **Developed a RAG (Retrieval-Augmented Generation) application** leveraging **Azure OpenAI** and **Azure Search Index** to provide accurate and context-aware responses by querying relevant data from indexed documents.
- Utilized **Azure Document Intelligence** to parse and extract structured data from diverse file formats,

enabling automated content extraction and processing.

- Implemented file processing pipelines using **Azure Databricks**, handling large-scale data transformations and ensuring seamless integration with other Azure services.
- Designed and managed file storage solutions on **Azure Storage Account**, ensuring high availability, security, and cost-effectiveness.
- Built the web application backend using **Quart** (similar to Flask) to enable robust, asynchronous API integrations and enhanced performance.
- Optimized the workflow to support scalable document ingestion, real-time query processing, and storage management.
- Ensured the application adhered to best practices in cloud security, scalability, and performance optimization.

Experience Senior Software Analyst, 04/2022 - 11/2023

EnergyTech global PVT Ltd

- Designed and implemented RESTful APIs for Website ElectricKiwi using flask.
- Implemented user authentication and authorization using OAuth2, ensuring robust security.
- Implemented the endpoint for the software application in flask and AWS using python lambda function, secret manager, s3 bucket
- Designed and implemented YAML-based Git pipelines to deploy AWS Lambda functions, Glue jobs, and S3 buckets for seamless code deployment and efficient data processing in AWS environment
- Participated in code reviews and followed coding standards and best practices.
- Wrote quality codes to program complete applications for ElectricKiwi website with odoo framework using python technology

Software Analyst, 09/2021 - 03/2022

EnergyTech global PVT Ltd

- Designed, developed and implemented software applications for website based on analyzed requirements and understanding of industry technical standards
- Fixed identified issues to increase productivity and boost workflows
- Collaborated with product owners, team members, technologists to define solutions and drive progress
- Involved and Working on Finance Models in Reamped website to achieve the business requirements.

Junior Software engineer, 12/2020 - 08/2021

Valuemomentum

- Developed robust Gosu code for Guidewire applications
- Expanded development efforts to include related platforms and protocols such as SOAP, REST and database technologies like SQL
- Investigated issues and defects to determine problem root cause and formulate corrective action

recommendations.

- Worked on sanity check project using Python Technology.

Software Intern, 01/2020 - 07/2020

Valuemomentum

- Offered training to end-users on Insurance product and Gosu technology and created reference materials and guidelines for everyday operations and troubleshooting tasks.

EDUCATION

Bachelor of Science: C.S.E, 06/2020

Keshav Memorial Institute of Technology - Hyderabad

CERTIFICATIONS

Specialist Certification - ClaimCenter 10.0 Configuration Specialist Certification - InsuranceSuite 10.0
Integration Specialist Certification - PolicyCenter 10.0 Configuration Specialist Certification -
