Key Skills	Mainframe, JCL, COBOL, DB2, VSAM, SQL
Description	Panorama (MetLife) is an engagement program to build the entire BPS application framework for MetLife. MetLife is transitioning its Annuity and Life business from 16 legacy administration systems onto a consolidated platform using the Wealth Management Accelerator (wMA) system. CSC' (now DXC TECHNOLOGY' s) Business Process Services (BPS) division will serve as a third-party administrator of the contracts on wMA version 1601 in CSC (now DXC TECHNOLOGY)' s Data Center. Wealth Management Accelerator (wMA) is a comprehensive system for companies to rapidly launch new products and enable policy owners to freely move between accumulation and distribution in a single contract. Multiple program tracks have been set up for the engagement due to the extensive scope of the transition effort and was part of steady state team basically.

PROJECTS@Ford motors

PROJECT1 EXPERIENCE:

Client	PTO FOCUS
