

Hima Sodha

+91-9845562856
hima.sodha@gmail.com

Multi skilled, result driven, detail-oriented technology professional with 10+ years of industry experience in design and development of applications and system components using agile methods.

Technical Skills

C C++ 11 C++ 14 Object Oriented Design Multi-threading Design Patterns UML JavaScript
Windows Linux WinCE Visual Studio PC Lint Intel Inspector Microsoft TFS Rational Clearcase
Agile Practices Embedded Systems HMI Industrial Automation SCADA Enterprise Architect
Sprint Planning

Strengths

Self-driven Leading by example Excellent analytical, design and problem-solving skills
Excellent communication skills Effective presentation skills
Collaboration across teams Ability to work in globally distributed teams

Professional Experience

Siemens Healthineers | August 2024 | Women Back to Work Program

- Currently working as Intern in Siemens healthineers under Women Back to Work Program. Post internship permanent position will be offered in organization.

Siemens | 2011-2018 | Associate Consultant

SCADA 2015

Roles: Engineer – Design and development, Mentor ,Lead

Technology: C++ 14, JavaScript, WEBES

Team Size: 10

Appreciation from clients for innovative, easy-to-use and fast delivery of Proof of Concepts (PoC)

- Modernized and enhanced the capabilities of the Web Engineering System (WEBES) with detailed designs, implementation, unit testing and user documentation of 4 new controls for Industrial automation.
- Demonstration and Implementation of successful PoC which provided client extreme ease of use with simplified interface without exposing internal model and complexity.
- Sprint planning for Scripting Team

WINCE RT(Run Time) and SM@RT for HMI(Human Machine Interface) Panel

Roles: Engineer – Design and development

Technology: C++ on WinCE, C++, QT,

- Ensured the longevity of the millions of devices in industries across the globe by modernizing and updating HMI panel software system with new control on new platform of innovation line devices.

QML on Linux

Team Size: 25

- Feature additions and bug fixes for Linux and WinCE based existing HMI panels.
- Submission of idea for Patent filing which went for product improvement

Wipro | 2007- 2011 | Software Engineer

Nokia Siemens Networks Modular Logistics System (NSN MLS)

Technology: C, C++, Oracle PL SQL

Role: Developer

Team Size: 8

Supported smooth operation of NSN Modular logistics system by

- Development of service module and integration with backend.
- Development of batch scripts and packages for service module.

Atheeb Telecommunication Consortium

Technology: C, C++

Role: Developer

Team Size: 10

Supported modernization of Atheeb telecom OSS systems by

- Development of mediation module.
- Development of Normalizer, Merger, Filter, Dispatcher components for CDR handling and processing in OSSSmart.

Achievements

- Won sprint awards for multiple complex deliverables with several dependencies ahead of planned timelines
- “FEATHER IN MY CAP” award winner in WIPRO for providing client with service improvement plan
- Achieved top ranks in Paper presentation, Poster presentation and Robotics competition at various national and state level competitions during college.
- Rank holder in Saurashtra University “Youth Festival” in Elocution Competition

Academic Qualifications

B. E. (Electronics & Communications)

V.V.P. Engineering College, Rajkot – affiliated to Saurashtra University
