EXPERIENCE

Data Scientist

Estateer Pvt Ltd

 DEC 2023 - Present

 Delhi, India

Speech Recognition

- Implemented a Speech Recognition model tailored for real estate data, interpreting voice commands for neighborhood specifics such as names and addresses.
- It guarantees precision through automated correction and organization of data.
- Integrated filtering capabilities based on criteria such as area size, orientation, and other parameters.
- Simplified the analysis and utilization of real estate data, enhancing efficiency and user experience.

Auto Generated Report (RAG Based Chatbot)

- Implemented a Retrieval-Augmented Generation (RAG) model with LlamaIndex Library for efficient retrieval of relevant PDF content based on user queries.
- Extracted text from PDFs using LlamaParse and used semantic chunking strategy.
- Utilized OpenAI's large language models to generate informative responses to user questions using the retrieved PDF information.
- Deployed the chatbot application on Microsoft Azure for scalability and accessibility.

Automated Valuation Model

- Developed a specialized real estate valuation model for the GCC region, integrating unique market factors for precise land property price forecasts.
- Led design, implementation, and fine-tuning phases of the Estateer property valuation model, ensuring its efficacy across diverse GCC contexts.
- Spearheaded the development and enhancement of an Automated Valuation Model (AVM), leveraging extensive datasets for thorough Exploratory Data Analysis (EDA) and data preprocessing.
- Utilized advanced machine learning techniques to construct a highly accurate predictive model for estimating land property prices.
- Implemented algorithmic methodologies, parameter optimization, and rigorous evaluations to optimize the AVM's performance and predictive capabilities.

Associate Data Scientist

Collabridge Pvt Ltd

 Aug 2021 - NOV 2023

 Hyderabad, India

Product Recommendation Tool

- Part of the Development team to develop a highly advanced DL-based product recommendation tool that increased conversion rates by 15%, while also improving productivity, achieving good market value, and improving customer satisfaction for Buildstorey.
- Understood client requirements and labeled images through R&D

PROFILE

I am a Data Scientist with over 3 years of professional experience, specializing in building predictive models and leveraging advanced techniques in generative AI, deep learning, and machine learning. My expertise spans designing, developing, and fine-tuning deep learning and LLM models, as well as debugging and optimizing NLP models for enhanced performance. I am adept at training models with fine-tuned datasets to improve the performance of existing AI systems, and I am deeply passionate about staying at the forefront of artificial intelligence innovations. I excel at identifying and implementing AI-driven solutions to address complex organizational needs and challenges.

TECHNICAL STRENGTH

Python, R
Machine Learning
Deep Learning
Gen AI
Computer vision
FlaskAPI, FastAPI
Swagger
Plumber
MYSQL
PowerBI
NLP
Django
flask
MongoDB

LIBRARIES

Pandas Numpy Transformers CNN
RNN llamaindex langchain Autogen
hugging face Langgraph scikit-learn
tidyverse Lubridate packages ggplot2
opencv tensorflow seaborn

- The tool addresses the unique challenges of e-commerce platforms by using a KNN algorithm to find the k closest images in the feature space, resulting in more accurate and relevant recommendations.
- It shows similar products based on customer input images, helping to attract more customers to client sites.
- Deployed the system on server using Fast API and Docker

Automated Bill Parser

- Part of the core development team to develop an end-to-end Bill automation system to extract relevant text/table information from Bill.
- Performed through R&D to understand client requirements and understand important data points to be extracted from Bill.
- Labelled the Bill using Roboflow for detecting 10+ data points.
- Trained an Object Detection model using YOLOv7 for 30+ invoice formats.
- Devised a rule-based parsing approach using pandas, regex, and text processing to extract tables and convert them to dataframes in the format required by the client.
- Deployed the system on AWS using Fast API and Docker.

AI Based Text Analytics

- Develop and Deployed an AI based model for customer review classification and sentiment analysis.
- Preprocessed data and converted Text into numerical features.
- Trained a Naive bayes's model on labelled dataset and achieved 92% accuracy.
- Evaluated this Model using various performance matrix such as accuracy, precision, recall.
- Deployed the system on server using Fast API.

SO FAR PROJECT EXPERIENCE

Face Mask Detection Model

Face mask detection is an object detection task that detects whether people are wearing mask or not in videos. Used OpenCV and YOLOv5.

Leaf Disease Detection Model

Developed a CNN based Leaf Detection Model. In which Convolutional neural network is utilized to identify infected and healthy leaves as well as to detect illness in infected plants. Then evaluated this Model using different types of matrices like Precision and Recall.

Automatic Number Plate Recognition

Developed a Automatic number plate recognition using Tensorflow and easyocr. It is used to localize and recognize potential licence plate regions of the vehicle images captured from handheld devices/Digital camera and mobile phone camera.

HOBBIES

Body Building

Workout on daily basis

Tracking

Going for mount climbing on every single year

Playing Games

Excited to play each and every outdoor games

TOOLS

VS Code

R Studio

PyCharm

Swagger

Git

Sublime

Ms-Excel

Docker

CLOUDS

AWS

Azure

EDUCATION

B.Tech in ECE

SKIT, Jaipur

Aug 2016 - Dec 2020

MOST PROUD OF

Winner 1st prize in Autonomous board

Winning the first prize in IARC at Techkriti and in Automation at SKIT Jaipur

Deliver on Time

Continuously work on various platform and expand learning capability in terms of quality

STRENGTHS

Hard-working

Adaptability

Persuasive

Motivator & Leader

Communication

Interpersonal Communication

Multitasking

Analytical Skills

Product Management
