SUMMARY

I am curious and inquisitive about data and its influence on fact- and insight-driven decision-making. Skilled in performing Exploratory Data Analysis, Advanced Analysis, Statistical Analysis, Parameter Estimation, Hypothesis Testing, Sentiment Analysis, Natural Language Processing (NLP), Image Processing, and Computer Vision. Currently seeking opportunities to enhance my skills and ensure growth in my data science career.

SKILLS

- **Technical:** Python, SQL, PySpark, Hive, Hadoop, OpenCV, Power BI, Tableau, Excel, VS Code, API, Flask, TensorFlow, Pytorch, NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, Data Mining, Data Wrangling, Clustering, Statistical Modeling, Quantitative Analysis, Transfer Learning, Reinforcement Learning, Microsoft Azure, AWS, CI/CD, Docker, AutoCAD, Solidworks.
- **Relevant Coursework:** Statistics, Machine Learning, Deep Learning, Artificial Intelligence, Predictive Analytics, Prescriptive Analytics, Big Data Business, Data Warehousing, Natural Language Processing, Programming for Data Science, Model Deployment.

WORK EXPERIENCE

Data Science & AI – Data Scientist

Aug 2024 - Present

Hansa Customer's Equity Pvt Ltd.

Client Project: Aditya Birla Life Insurance

- Hands-on experience on SQL, extracting and managing large datasets from SQL Server for model-related analysis.
- Conducted in-depth EDA to identify patterns and insights, supporting data-driven decisions.
- Performed complex statistical analyses to understand trends and factors affecting customer behaviour.
- Built and optimized supervised machine learning classification models to predict customer lapsation using Logistic Regression, Decision Tree, Random Forest, SVC, SGD, and Boosting algorithms such as Gradient Boost & XG Boost, as well as other ensemble methods.
- Developed models to predict persistency of customer for 13th year Lapse, Direct Marketing Channel Lapse Model for life insurance.
- Documented model performance using key evaluation metrics including Accuracy Score, AUC, ROC, and developed KS tables for detailed performance analysis.

Client Project: IFB Ltd.

- Created Association Rules & Frequent Items Bought from past User Data using Apriori, FP Growth, Eclat Algorithm & clustering into Tier, Age & other variables considering Information value, Variance inflation factor & weight of Evidence for calculating Information Gain.
- Built Classification Machine Learning Model for Cross-selling unique products of IFB such as Washing Machine, AC, Dishwasher etc. using Supervised ML Algorithms predicting the next best offer for Sales & Marketing.
- Documented model performance using key evaluation metrics, developed KS tables for detailed performance analysis.

Client Project: Abbott Healthcare

- Extracting and managing large data from SQL Server for model-related analysis.
- Conducted in-depth EDA to identify patterns and insights, supporting data-driven decisions on Abbott Ensure healthcare Brand Items & other Food Products.
- Building Predictive Models for determining Lead Users to target customers buying specific product items using K-Means, K-Proto Clustering, Hierarchical Clustering Algorithm.
- Detailed Performance Analysis & documentation using Evaluation Metrics.

PROJECTS

- **Cardiac Arrhythmia Prediction**
Converted heartbeat recordings to spectrogram images, then used machine learning algorithms such as Logistic Regression, Decision Tree, CNN, Deep CNN, and Transfer Learning models to predict whether the heartbeat is normal, fast, or abnormal.
- **Credit Risk Analytics**
The main objective of this project is to predict the loan eligibility of customers using machine learning algorithms. Created a Flask web application and REST API for model deployment on the Heroku platform.
- **Liver Cirrhosis Prediction**
The main objective is to predict the stages of liver severity, from 1 to 4, based on patients' blood reports, blood count, medical history, and medical terms using machine learning algorithms.
- **Image Scene Classification using Transfer Learning**
Developed a CNN model from scratch to predict image scenes such as forests, buildings, or the sea. Fine-tuned pre-trained models like VGG16, ResNet50, and Inception on the same dataset for comparison. Created an inference pipeline for new data.
- **Customer Default Prediction Using ML and DL**
Predicted loan defaulters for a loan lending corporation by applying algorithms such as Logistic Regression, Random Forest, Gradient Boosting, and Artificial Neural Networks.
- **Object Detection and Tracking**
Identify and track objects in real-time video and images using object detection algorithms such as YOLO V3 and MASK R-CNN.
- **Fashion-Class-Classification-Using-CNN**
The dataset consists of 28x28 grayscale images, and the target classes range from 1 to 10, representing different categories such as shoes or pants. The goal is to use a CNN to classify these fashion categories.

ACHIEVEMENTS

- **Secured 4th rank in Analytics Hackathon**, 2023 hosted by "Imarticus Learning" in partnership with "SKILLENZA". Performed multiclass classification of housing grades for a realtor based on house specifications and pricing data using techniques like logistic regression, gradient boosting, and deep learning models.
- **Gold Medal at National Level Avishkar Research Convention** 2018-19 for Final Year Project representing 'Mumbai University' in 2019.
- Former **Vice-President of MESA** (Mechanical Engineering Students Association) of A.C. Patil College of Engineering, Kharghar 2017-18.
- **Participated & Represented A.C. Patil C.O.E. four times at 'National Level Basketball** Tournament in MIT SUMMIT, Pune' during 2015-18.
- **Secured First Place at 'State Level Basketball Championship'** representing Mumbai Central District 2013.

EDUCATION

POSTGRADUATE PROGRAM IN DATA ANALYTICS & AI <i>Imarticus Learning, Andheri</i>	Sept 2023
B.E IN MECHANICAL ENGINEERING <i>A.C. Patil College of Engineering, Kharghar (CGPA 7.47)</i>	May 2019
HSC <i>G.N. Khalsa College of Science, Commerce & Arts, Matunga (67.54%)</i>	June 2015
SSC	May 2013

PERSONAL INFORMATION

- **Address:** Vikhroli, Mumbai, Maharashtra, India - 400083
- **Father's Name:** Madan V. Kashte
- **Date of Birth:** 09/02/1998
- **Languages Known:** English(R/W/S), Marathi(R/W/S), Hindi(R/W/S)
