

Imran Shaik

Vijayawada, AP | +91 9014488107 | shaikimran2723@gmail.com | [Linkedin](#) | [Github](#)

EDUCATION

VR Siddhartha Engineering College

Bachelor of Technology in Electrical and Electronics Engineering.

CGPA: 9.09

12/2021 - 04/2024

Nuzvid Polytechnic College

Diploma in Electrical and Electronics Engineering

Percentage: 93.14%

06/2018 - 08/2021

WORK EXPERIENCE

Packaged App Development Associate

Accenture

02/2024 -- 06/2024.

Location: Bengaluru

- Worked in the stream of SDV onboard AUTOSAR, and gained hands-on debugging skills.
- Applied advanced C++ programming skills on Linux platforms to develop robust and efficient middleware components.
- I gained hands-on experience with the RTOS in Linux, managing and automating the system design through complex algorithms.

Internship on Internet of Things

Emertxe

06/2022 -- 08/2022

Location: Bengaluru

- Collaborated effectively with a team of 5 to implement Home automation using embedded systems and IOT.
- Learned C Programming Skills in ATmega328 Microcontroller.
- Applied debugging skills using emulators.

PROJECTS

Adaptive Cruise Control (ACC) System | C (programming), S32K148, CAN,S32 DesignStudio

05/2024 - 06/2024

- Developed an Adaptive Cruise Control system for maintaining a set speed and safe following distance.
- Integrated ultrasonic and LIDAR sensors using ADC for distance data processing and configured CAN communication with the vehicle's ECU, throttle, and braking systems.
- Debugging the firmware to ensure the functionality properly using the NXP S32K148 evaluation board for development and testing.

SmartLighting System using Raspberry pi | Python, Raspberry Pi, Yolo V8, Thonny IDE

07/2023 -- 08/2023

- Developed a fully automated seminar hall using Raspberry Pi Camera.
- Implemented a new methodology for automation of seminar hall using deep learning models.
- Developed firmware that accurately controls the hardware based on camera feed by using the YOLO V8 model.

IoT-Based Railway Crossing Gate System | C (programming), Arduino, JavaScript, ThingSpeak

11/2022 - 02/2023

- Developed an IoT-based Traffic Management System for railway crossing gates using C language.
- Utilized Arduino and ESP8266 for firmware development, leveraging C programming language.
- Implemented UART and SPI communication protocols for communication between Arduino, ESP8266, and sensors.
- Created a user-friendly website interface for real-time gate status information, enhancing traffic management.

TECHNICAL SKILLS

Languages: C, Python, C++, Object-Oriented Programming System Design.

Operating System: Linux (Ubuntu), Windows.

Tech-stack: Embedded systems, IoT, Communication protocols(UART, SPI, I2c, CAN).

Soft Skills: Team player, Problem-solving, Communication.

CERTIFICATION & ACHIEVEMENTS

- NPTEL Certification of IIT Kharagpur on "Introduction to Internet of Things".
- PrepInsta Certification on C++.
- Won In Paper Presentation Conducted By Usha Rama College Of Engineering And Technology.
- Finalist in IET Scholarship 2022.
